

American Beacon DoubleLine Select Income Fund

Quarterly Fact Sheet data as of December 31, 2025

INVESTMENT OBJECTIVE

The investment objective of the Fund is to seek long-term total return while striving to generate current income.

EXPERTISE IN CORPORATE CREDIT STRATEGIES

DoubleLine Capital LP, is a privately owned, employee-controlled asset management business founded by Jeffrey Gundlach and 45 colleagues in 2009. DoubleLine provides investment management services with a cardinal mandate: to help deliver attractive risk-adjusted returns to clients. The DoubleLine Select Income team's investment philosophy aims to focus on capital preservation while seeking the best relative value opportunities in the infrastructure debt and fixed-income sector.

STRATEGY AND OBJECTIVES

- **Attractive Yield:** The Fund endeavors to achieve a strong yield and a low duration.
- **Diversification:** The Fund provides significant opportunity for diversification with a low correlation to the Bloomberg US Aggregate Bond Index.
- **Exploiting market inefficiencies:** The Fund seeks out unique inefficiencies in corporate and securitized debt with a sub-advisor that has deep experience in asset-based finance.

The use of **fixed-income securities** entails interest rate and credit risks. **Interest rate risk** is the risk that debt securities will decrease in value with increases in market interest rates. **Credit risk** is the risk that a debt issuer will fail to make timely payment of interest or principal; the decline in an issuer's credit rating can cause the price of its debt securities to go down. In addition, **loans** are subject to the risk that the Fund may not be able to obtain the collateral securing the loan in a timely manner, and the value of the collateral may not cover the amount owed on the loan. Concentration in **infrastructure investments** makes the Fund dependent upon the successful development, construction, maintenance, renovation, enhancement or operation of infrastructure-related projects, which may be negatively affected by economic, regulatory, political, legal, demographic, environmental, and other developments. Investments in **high-yield securities** (commonly referred to as "junk bonds"), including **loans, CLOs, restricted securities and floating-rate securities**, are subject to greater levels of credit, interest rate, market and liquidity risks than investment-grade securities. Investing in **foreign and emerging markets** may involve heightened risk due to currency fluctuations and economic and political risks. **Derivative instruments** may be highly sensitive to market factors, have less liquidity than other investments and involve the potential for losses to exceed the amount invested. Because the Fund may invest in **fewer issuers** than a more diversified portfolio, the fluctuating value of a single holding may have a greater effect on the value of the Fund. Please see the prospectus for a complete discussion of the Fund's risks. There can be no assurances that the investment objectives of this Fund will be met.

Important Information: All investing involves risk, including possible loss of principal. Indexes are unmanaged and one cannot invest directly in an index.

The Growth of \$10,000 graph shows a fund's performance based on how \$10,000 invested in the fund would have grown over time with dividends reinvested.

S&P credit ratings for long-term obligations (or issuers thereof) are AAA, AA, A, BBB, BB, B, CCC, CC, C and D in decreasing order. For example, obligations rated AAA are judged to be of the highest quality,

BBB to be of medium grade, CCC are judged to be speculative and obligations rated D are in default. Obligations rated in one of the four highest categories are considered to be investment grade while all other ratings are considered non-investment grade.

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within the scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of performance figures associated with its three-, five- and 10-year (if applicable) Morningstar Rating metrics. In the U.S.-domiciled Intermediate Core Bond category, the American Beacon DoubleLine Select Income Fund (Y Class) was rated 5 stars out of 414 funds overall. The fund was rated 5 stars out of 414 funds and 5 stars out of 374 funds for the three- and 5-year periods, respectively. Past performance is no guarantee of future results.
