# TwentyFour Strategic Income Fund

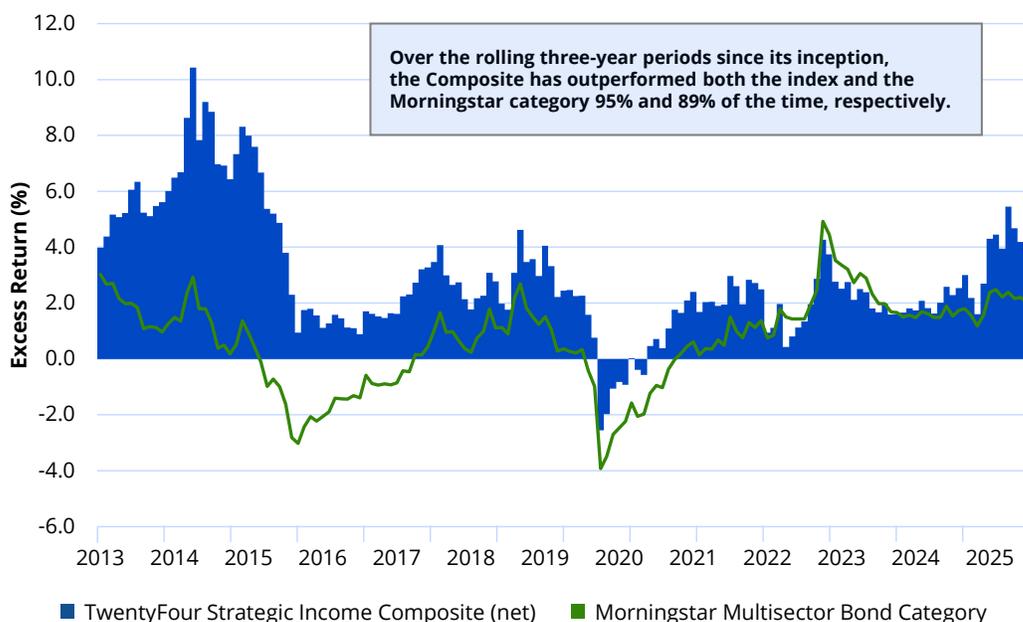

**R5:** TFGIX | **Investor:** TFGPX | **Y:** TFGYX | **A:** TFSAX | **C:** TFGCX

Data as of February 28, 2026

## Seeking Consistent Outperformance

Since its inception, the TwentyFour Strategic Income Composite (net) has produced positive excess returns in 144 out of 151 rolling three-year periods versus the Bloomberg Global-Aggregate Total Return Index Value Hedged USD.

**Rolling 3-Year Excess Returns** (Composite Inception - December 31, 2025)

Source: Morningstar. Composite inception: 6/11/10. The sub-advisor manages other accounts that have substantially similar objectives, policies and strategies to the Fund. All such accounts are included in the composite shown herein, the performance of which has been calculated by the sub-advisor. The net performance reflects the deduction of all actual expenses incurred by accounts included in the composite. The composite has not been adjusted to reflect the higher expenses of the Fund. If the Fund's higher expenses were reflected, the composite performance presented would be lower. The performance of the composite does not represent the historical performance of the Fund and should not be considered indicative of future performance of the Fund. Results may differ because of, among other things, differences in performance calculation methods, brokerage commissions, account expenses, including management fees, the size of positions taken in relation to account size and diversification of securities, timing of purchases and sales, and availability of cash for new investments. In addition, the accounts included in the composite are not subject to certain investment limitations, diversification or other restrictions imposed on mutual funds which, if applicable, may have adversely affected the performance results of the composite.

Performance shown is historical and is not indicative of future returns. Investment returns and principal value will vary, and shares may be worth more or less at redemption than at original purchase. Performance shown is as of date indicated, and current performance may be lower or higher than the performance data quoted.

**OVERALL MORNINGSTAR RATING™**  
as of December 31, 2025

**Y Class shares among 334 Multisector Bond funds**

Morningstar ratings may vary among share classes and are based on 3-, 5- and 10-year (when applicable) risk-adjusted total returns, which are not indicative of future results.

**This material is for financial professional use only. It may not be reproduced or shown to members of the public or used in written form as sales literature.**

The use of **fixed-income securities** entails interest rate and credit risks. **Derivative instruments** may be highly sensitive to market factors, have less liquidity than other investments and involve the potential for losses to exceed the amount invested. **Interest rate risk** is the risk that debt securities will decrease in value with increases in market interest rates. **Credit risk** is the risk that a debt issuer will fail to make timely payment of interest or principal; if the credit rating of an issuer declines, then the price of its debt securities may also decline. Investments in **high-yield securities** (commonly referred to as "junk bonds"), including **loans, CLOs, restricted securities and floating-rate securities**, are subject to greater levels of credit, interest rate, market and liquidity risks than investment-grade securities. The Fund may have **high portfolio turnover risk**, which could increase the Fund's transaction costs and possibly have a negative impact on performance. To the extent the Fund invests more heavily in particular sectors, its performance will be sensitive to factors affecting those sectors. **Financial sector** companies are heavily regulated and particularly sensitive to interest rate fluctuations. To the extent the Fund invests more heavily in a particular **country or geographic region**, its performance will be sensitive to factors affecting that country or region. Investing in **foreign and emerging markets** may involve heightened risk due to currency fluctuations and economic and political risks. Geopolitical and other events have led to **market disruptions** causing adverse changes in the value of investments broadly. Changes in value may be temporary or may last for extended periods. The Fund's incorporation of **environmental, social and/or governance (ESG)** considerations in its investment strategy may cause it to underperform funds that do not incorporate these considerations. Please see the prospectus for a complete discussion of the Fund's risks. There can be no assurances that the investment objectives of this Fund will be met.

**Important Information:** All investing involves risk, including possible loss of principal. Indexes are unmanaged and one cannot invest directly in an index.

A portion of fees charged to each Class of American Beacon TwentyFour Strategic Income Fund has been waived since Fund inception. Performance prior to waiving fees was lower than actual returns shown for periods when fees were waived. Specific information about any Fund may be found at [americanbeaconfunds.com](http://americanbeaconfunds.com) or in the [prospectus](#).

The Bloomberg Global-Aggregate Total Return Index Value Hedged USD is a flagship measure of global investment-grade debt from a multitude of local currency markets. This multi-currency benchmark includes treasury, government-related, corporate and securitized fixed-rate bonds from both developed and emerging markets issuers.

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within the scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of performance figures associated with its three-, five- and 10-year (if applicable) Morningstar Rating metrics. In the U.S.-domiciled Multisector Bond category, the **American Beacon TwentyFour Strategic Income Fund (Y Class)** was rated 4 stars out of 334 funds overall. The fund was rated 5 stars out of 334 funds; 3 stars out of 302 funds for the three- and five-year periods, respectively. Past performance is no guarantee of future results.
