

American Beacon Balanced Fund

Quarterly Fact Sheet data as of March 31, 2026

INVESTMENT OBJECTIVE

A multi-manager Fund seeking income and capital appreciation.

EQUITY DIVERSIFICATION WITH THE STABILITY OF BONDS

The Fund invests in a combination of stocks and bonds, with 50% to 70% of the Fund's assets allocated to stocks and 30% to 50% to bonds.

- Bottom-up equity portfolio construction that is well diversified at the security, industry and stock level.
- Investment-grade fixed-income portfolio seeks to preserve the natural advantage of bonds, which promotes stability of the Fund.

TEAM OF MANAGERS

The Fund's complementary equity managers pursue a value style of investing:

Barrow: Uses bottom-up analysis, seeking P/E and P/B ratios below the market and dividend yield above the market.

H&W: Seeks companies with sustainable cash flows and strong balance sheets, undervalued relative to tangible assets and long-term normal earnings power.

The Fund's complementary fixed-income managers invest in investment-grade debt securities:

Barrow: Seeks to "out-yield" the market with undervalued or mispriced securities and sectors.

American Beacon Advisors: Diversified sector rotator, uncovering differences between similarly rated issuers to capture relative value opportunities.

The Fund may purchase and sell futures contracts to gain market exposure on cash balances.

Applies to bond portion of the Fund. Excludes cash.

The use of **fixed-income securities** entails interest rate and credit risks. **Interest rate risk** is the risk that debt securities will decrease in value with increases in market interest rates. **Credit risk** is the risk that a debt issuer will fail to make timely payment of interest or principal; if the credit rating of an issuer declines, then the price of its debt securities may also decline. Investing in **foreign markets** may involve heightened risk due to currency fluctuations and economic and political risks. Investing in value stocks may limit downside risk over time; however, the Fund may produce more modest gains than riskier stock funds as a trade-off for this potentially lower risk. To the extent the Fund invests more heavily in particular sectors, its performance will be sensitive to factors affecting those sectors. **Financial sector** companies are heavily regulated and particularly sensitive to interest rate fluctuations. The use of **futures contracts** for cash management may subject the Fund to losing more money than invested. The Fund participates in a **securities lending** program. Please see the prospectus for a complete discussion of the Fund's risks. There can be no assurances that the investment objectives of this Fund will be met.

Important Information: All investing involves risk, including possible loss of principal. Indexes are unmanaged and one cannot invest directly in an index.

The Balanced Composite Index is composed of the Russell 1000 Value Index (60%) and the Bloomberg U.S. Aggregate Bond Index (40%) to reflect the Fund's allocation of its assets between equity securities and fixed-income securities.

The Russell 1000® Value Index is an unmanaged index of those stocks in the Russell 1000® Index with lower price-to-book ratios and lower forecasted growth values. The P/E Ratio of a stock is calculated by dividing the current price by forecasted 12-month earnings per share. The P/B Ratio of a stock is calculated by dividing the current price by book value per share. Return on Equity (ROE) is net income divided by net worth. R-squared (R2) is the percentage of the Fund's three-year return that is explained by movements in its benchmark index. Alpha is a measure of the Fund's expected performance versus the benchmark, adjusted for relative risk. Beta is a measure of the Fund's volatility versus the benchmark. Sharpe Ratio is a measure of the Fund's return per unit of total risk. Standard Deviation is a measure of the historical volatility of the Fund's returns. Duration is a measure of price sensitivity relative to changes in interest rates.

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within the scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of performance figures associated with its three-, five- and 10-year (if applicable) Morningstar Rating metrics. In the U.S. - domiciled Moderate Allocation category, the American Beacon Balanced Fund (R5 Class) was rated 3 stars out of 465 funds overall. The fund was rated 3 stars out of 465 funds; 3 stars out of 445 funds and 3 stars out of 371 funds for the three-, five- and 10-year periods, respectively. Past performance is no guarantee of future results.
