CONSISTENCY OF OUTPERFORMANCE: The IMC Non-U.S. Small Cap Composite (USD) has outperformed its Index, Developed Non-U.S. Equities and Emerging Market Equities a majority of the time over various rolling return periods. (Since Inception – March 31, 2026)

Source: Morningstar.

Investing in **small-capitalization stocks** may involve greater volatility and lower liquidity than larger company stocks. **Growth stocks** typically are more volatile than value stocks; however, value stocks have a lower expected growth rate in earnings and sales. Investing in **foreign and emerging markets** may involve heightened risk due to currency fluctuations and economic and political risks. To the extent the Fund invests more heavily in a particular **country or geographic region**, its performance will be sensitive to factors affecting that country or region. The Fund may have **high portfolio turnover risk**, which could increase the Fund's transaction costs and possibly have a negative impact on performance. Geopolitical and other events have led to **market disruptions** causing adverse changes in the value of investments broadly. Changes in value may be temporary or may last for extended periods. The use of **futures contracts** for cash management may subject the Fund to losing more money than invested. The Fund participates in a **securities lending** program. Please see the prospectus for a complete discussion of the Fund's risks. There can be no assurances that the investment objectives of this Fund will be met.

Important Information: All investing involves risk, including possible loss of principal. Indexes are unmanaged and one cannot invest directly in an index. Please note that the recent performance of the securities market has helped produce short-term returns that are not typical and may not continue in the future.

For any Class of the Fund that began operating within the 10-year/since inception period shown, the performance shown prior to the inception date of the Class is that of a class (or series of classes) previously in operation. The combined returns have not been adjusted for any difference between the fees and expenses of the Class and the historical fees and expenses of the included previous class (or classes). If the previous class(es) had lower expenses, the resulting performance would be better than the Class would have realized during the same period. If the previous class(es) had higher expenses, the resulting performance would be lower than the Class would have realized during the same period. Specific information about any Fund may be found at americanbeaconfunds.com or in the prospectus.

The MSCI ACWI (All Country World Index) ex USA Small Cap Index is a market-capitalization-weighted index designed to measure the investable equity market performance for global investors of small-cap stocks in developed and emerging markets, excluding the United States. The MSCI® EAFE Index is a market capitalization weighted index of international stock performance composed of equities from developed markets excluding the U.S. and Canada. MSCI® Emerging Markets Index is a market capitalization weighted index that is designed to measure the investable equity market performance for global investors in emerging markets. Certain information contained herein (the "Information") is sourced from/copyright of MSCI Inc., MSCI ESG Research LLC, or their affiliates ("MSCI"), or information providers (together the "MSCI Parties") and may have been used to calculate scores, signals, or other indicators. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within the scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of performance figures associated with its three-, five and 10-year (if applicable) Morningstar Rating metrics. In the U.S.-domiciled Foreign Small/Mid Growth category, the **American Beacon IMC International Small Cap Fund (Y Class)** was rated 5 stars out of 108 funds overall. The fund was rated 5 stars out of 108 funds; 5 stars out of 97 funds and 4 stars out of 83 funds for the three-, five and 10-year periods, respectively. Past performance is no guarantee of future results.
