Investing in **foreign and emerging markets** may involve heightened risk due to currency fluctuations and economic and political risks. Geopolitical and other events have led to **market disruptions** causing adverse changes in the value of investments broadly. Changes in value may be temporary or may last for extended periods. To the extent the Fund invests more heavily in a particular **country or geographic region**, its performance will be sensitive to factors affecting that country or region. To the extent the Fund invests more heavily in particular sectors, its performance will be sensitive to factors affecting those sectors. **Information Technology** sector companies may face intense competition and rapid product obsolescence; have limited product lines, markets, financial resources or personnel; and lose patent, copyright and trademark protections. The Fund's incorporation of **environmental, social and/or governance (ESG)** considerations in its investment strategy may cause it to underperform funds that do not incorporate these considerations. The Fund participates in a **securities lending** program. Please see the prospectus for a complete discussion of the Fund's risks. There can be no assurances that the investment objectives of the Fund will be met.

Important Information: All investing involves risk, including possible loss of principal. Indexes are unmanaged and one cannot invest directly in an index. Please note that the recent performance of the securities market has helped produce short-term returns that are not typical and may not continue in the future.

The Growth of \$10,000 graph shows a fund's performance based on how \$10,000 invested in the fund would have grown over time with dividends reinvested.

The P/E Ratio of a stock is calculated by dividing the current price by forecasted 12-month earnings per share. The P/B Ratio of a stock is calculated by dividing the current price by book value per share. Return on Equity (ROE) is net income divided by net worth. R-squared (R2) is the percentage of the Fund's three-year return that is explained by movements in its benchmark index. Alpha is a measure of the Fund's expected performance versus the benchmark, adjusted for relative risk. Beta is a measure of the Fund's volatility versus the benchmark. Sharpe Ratio is a measure of the Fund's return per unit of total risk. Standard Deviation is a measure of the historical volatility of the Fund's returns.

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within the scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of performance figures associated with its three-, five- and 10-year (if applicable) Morningstar Rating metrics. In the U.S.-domiciled Diversified Emerging Markets category, the American Beacon Ninety One Emerging Markets Equity Fund (R5 Class) was rated 3 stars out of 694 funds overall. The fund was rated 4 stars out of 694 funds; 3 stars out of 617 funds for the three- and five-year periods, respectively. Past performance is no guarantee of future results.
