

American Beacon Small Cap Value Fund

Quarterly Fact Sheet data as of March 31, 2026

INVESTMENT OBJECTIVE

A multi-manager Fund seeking long-term capital appreciation and current income primarily through investments in small market capitalization U.S. stocks.

FAR-REACHING STRATEGY

The multi-manager approach of the Fund enhances the diversification that can help lessen portfolio volatility in the long term.

- Its bottom-up portfolio construction is well diversified at the security, industry and stock levels.
- The primary emphasis is on finding growth expectations.

TEAM OF MANAGERS

The Fund is sub-advised by five complementary asset managers, seeking stocks with:

Barrow: Below-market valuations and above-market free cash flow yield.

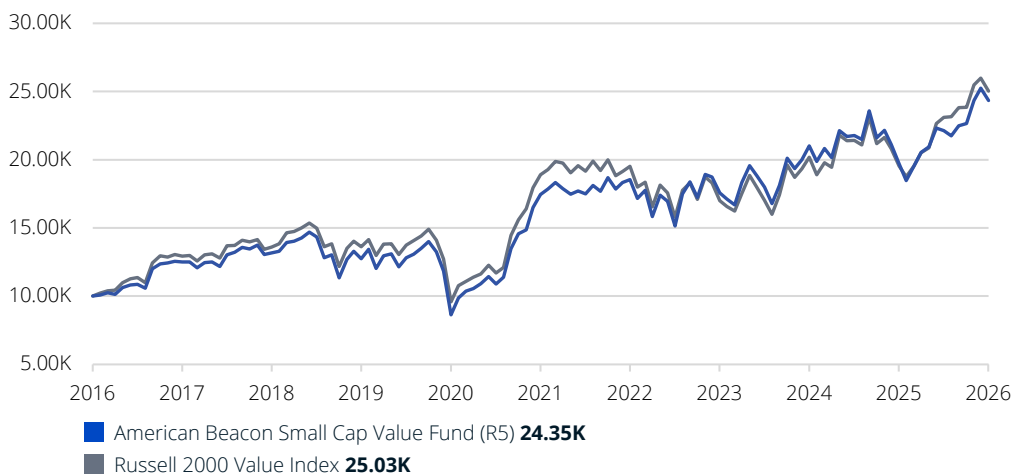

Brandywine Global: Low valuations and attractive price momentum, combining quantitative analysis with fundamental insights.

DRZ: Minimum dividend yield of 1%, attractive relative valuation and imminent fundamental catalyst.

H&W: Sustainable cash flows and strong balance sheets, undervalued relative to tangible assets and long-term normal earnings power.

Westwood: High-quality characteristics that possess undervalued earnings growth and asymmetric return potential.

GROWTH OF \$10,000 (MARCH 31, 2016 — MARCH 31, 2026)

Investing in **small-capitalization stocks** may involve greater volatility and lower liquidity than larger company stocks. Investing in **value stocks** may limit downside risk over time; however, the Fund may produce more modest gains than riskier stock funds as a trade-off for this potentially lower risk. Investing in **foreign markets** may involve heightened risk due to currency fluctuations and economic and political risks. To the extent the Fund invests more heavily in particular sectors, its performance will be sensitive to factors affecting those sectors. **Financial sector** companies are heavily regulated and particularly sensitive to interest rate fluctuations. The Fund's incorporation of **environmental, social and/or governance (ESG)** considerations in its investment strategy may cause it to underperform funds that do not incorporate these considerations. The use of **futures contracts** for cash management may subject the Fund to losing more money than invested. The Fund participates in a **securities lending** program. Please see the prospectus for a complete discussion of the Fund's risks. There can be no assurances that the investment objectives of this Fund will be met.

Important Information: All investing involves risk, including possible loss of principal. Indexes are unmanaged and one cannot invest directly in an index. Please note that the recent performance of the securities market has helped produce short-term returns that are not typical and may not continue in the future.

The Growth of \$10,000 graph shows a fund's performance based on how \$10,000 invested in the fund would have grown over time with dividends reinvested.

The Russell 2000 Value Index is an unmanaged index of those stocks in the Russell 2000 Index with lower price-to-book ratios and lower forecasted growth values. The P/E Ratio of a stock is calculated by dividing the current price by forecasted 12-month earnings per share. The P/B Ratio of a stock is calculated by dividing the current price by book value per share. Return on Equity (ROE) is net income divided by net worth. R-squared (R2) is the percentage of the Fund's three-year return that is explained by movements in its benchmark index. Alpha is a measure of

the Fund's expected performance versus the benchmark, adjusted for relative risk. Beta is a measure of the Fund's volatility versus the benchmark. Sharpe Ratio is a measure of the Fund's return per unit of total risk. Standard Deviation is a measure of the historical volatility of the Fund's returns.

The Morningstar Style Box™ reveals a fund's current investment strategy. For equity funds, the vertical axis is based on market capitalization of the Fund's holdings (large, mid and small); the horizontal axis shows growth and valuation analysis of the Fund's holdings (value, blend and growth).

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within the scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of performance figures associated with its three-, five- and 10-year (if applicable) Morningstar Rating metrics. In the U.S.-domiciled Small Value category, the American Beacon Small Cap Value Fund (R5 Class) was rated 3 stars out of 460 funds overall. The fund was rated 3 stars out of 460 funds; 3 stars out of 437 funds and 3 stars out of 360 funds for the three-, five- and 10-year periods, respectively.
