## Report of Independent Registered Public Accounting Firm

---

To the Board of Trustees of American Beacon Funds and Shareholders of American Beacon DoubleLine Floating Rate Fund and American Beacon DoubleLine Select Income Fund

### *Opinions on the Financial Statements*

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of American Beacon DoubleLine Floating Rate Fund and American Beacon DoubleLine Select Income Fund (two of the funds constituting American Beacon Funds, hereafter collectively referred to as the “Funds”) as of March 31, 2026, the related statements of operations for the year ended March 31, 2026, the statements of changes in net assets for each of the two years in the period ended March 31, 2026, including the related notes, and the financial highlights for each of the periods indicated therein (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of March 31, 2026, the results of each of their operations for the year then ended, the changes in each of their net assets for each of the two years in the period ended March 31, 2026 and each of the financial highlights for each of the periods indicated therein, conformity with accounting principles generally accepted in the United States of America.

### *Basis for Opinions*

These financial statements are the responsibility of the Funds’ management. Our responsibility is to express an opinion on the Funds’ financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of March 31, 2026, by correspondence with the custodian, agent banks and brokers; when replies were not received from the brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

/s/ PricewaterhouseCoopers LLP  
Boston, Massachusetts  
May 28, 2026

We have served as the auditor of one or more investment companies in the American Beacon family of funds since 2016.

<b>TOTAL NET ASSETS - 100.0%</b>		<b>\$ 129,035,488</b>

Percentages are stated as a percent of net assets.

<sup>A</sup> Non-income producing security.

<sup>B</sup> Value was determined using significant unobservable inputs.

<sup>C</sup> Security has been fair valued pursuant to the Manager's procedures related to pricing that is not available after the close of exchange or the available price does not reflect the security's true market value. At period end, the value of these securities amounted to \$85,420 or 0.1% of net assets.

<sup>D</sup> A type of Preferred Stock that has no maturity date.

<sup>E</sup> Bank loan obligations, unless otherwise stated, carry a floating rate of interest. The coupon rate shown on floating or adjustable rate securities represents the rate at period end.

<sup>F</sup> Coupon rates may not be available for all or a portion of bank loans that are unsettled and/or unfunded as of March 31, 2026.

<sup>G</sup> Default Security. At period end, the amount of securities in default was \$0 or 0.0% of net assets.

<sup>H</sup> Zero coupon bank loan.

<sup>I</sup> All or a portion of the security is an Unfunded Loan Commitment. The rate represents the current interest rate if the loan is partially funded.

<sup>J</sup> Security exempt from registration under the Securities Act of 1933. These securities may be resold to qualified institutional buyers pursuant to Rule 144A. At the period end, the value of these securities amounted to \$6,014,565 or 4.7% of net assets. The Fund has no right to demand registration of these securities.

<sup>K</sup> The Fund is affiliated by having the same investment advisor.

<sup>L</sup> 7-day yield.

LLC - Limited Liability Company.

LP - Limited Partnership.

PIK - Payment in Kind.

PLC - Public Limited Company.

PRIME - A rate, charged by banks, based on the U.S. Federal Funds rate.

USD - United States Dollar.

## Schedule of Investments

March 31, 2026

The Fund's investments are summarized by level based on the inputs used to determine their values. As of March 31, 2026, the investments were classified as described below:

American Beacon DoubleLine Floating Rate Fund	Level 1	Level 2	Level 3	Total
<b>Assets</b>				
Common Stocks . . . . .	\$ -	\$ 1,409	\$ 0 <sup>(1)</sup>	\$ 1,409 <sup>(1)</sup>
Preferred Stocks . . . . .	-	-	0 <sup>(1)</sup>	0 <sup>(1)</sup>
Bank Loan Obligations . . . . .	-	112,947,910	0 <sup>(1)</sup>	112,947,910 <sup>(1)</sup>
Corporate Obligations . . . . .	-	5,955,995	-	5,955,995
Foreign Corporate Obligations . . . . .	-	531,427	-	531,427
Foreign Common Stocks . . . . .	-	-	85,420	85,420
Short-Term Investments . . . . .	13,198,054	-	-	13,198,054
Total Investments in Securities - Assets . . . . .	<u>\$ 13,198,054</u>	<u>\$ 119,436,741</u>	<u>\$ 85,420<sup>(1)</sup></u>	<u>\$ 132,720,215</u>

<sup>(1)</sup> Includes investments held in the Fund's portfolio with \$0 fair value.

U.S. GAAP requires transfers between all levels to/from level 3 be disclosed. During the year ended March 31, 2026, one Foreign Common Stock was transferred from Level 2 to Level 3 with a fair value of \$54,483.

The following table is a reconciliation of Level 3 assets within the Fund for which significant unobservable inputs were used to determine fair value. Transfers in or out of Level 3 represent the ending value of any security or instrument where a change in the level has occurred from the beginning to the end of the year:

Security Type	Balance as of 3/31/2025	Purchases	Sales	Accrued Discounts (Premiums)	Realized Gain (Loss)	Change in Unrealized Appreciation (Depreciation)	Transfer into Level 3	Transfer out of Level 3	Balance as of 3/31/2026	Unrealized Appreciation (Depreciation) at Year End*
Common Stocks . . .	\$121,912	\$ 158,774	\$477,283	\$ -	\$427,681	\$ (231,084)	\$ -	\$ -	\$ 0 <sup>(1)</sup>	\$ (158,774)
Preferred Stocks . . .	-	339,302	-	-	-	(339,302)	-	-	0 <sup>(1)</sup>	(339,302)
Bank Loan Obligations . . . . .	1,315	705,979	8,965	1,344	94	(699,767)	-	-	0 <sup>(1)</sup>	(934,165)
Foreign Common Stocks . . . . .	0 <sup>(1)</sup>	31,253	-	-	-	(316)	54,483	-	85,420	(52,297)
	<u>\$123,227</u>	<u>\$1,235,308</u>	<u>\$486,248</u>	<u>\$ 1,344</u>	<u>\$427,775</u>	<u>\$ (1,270,469)</u>	<u>\$54,483</u>	<u>\$ -</u>	<u>\$ 85,420</u>	<u>\$ (1,484,538)</u>

\* Change in unrealized appreciation (depreciation) attributable to Level 3 securities held at year end. This balance is included in the change in unrealized appreciation (depreciation) on the Statements of Operations

<sup>(1)</sup> Includes investments held in the Fund's portfolio with \$0 fair value.

For the year ended March 31, 2026, three common stocks, one preferred stock, and two bank loan obligations have been fair valued at \$0 and one Foreign Common Stock has been valued at \$85,420 by the Valuation Committee using significant unobservable inputs.

The following is a summary of quantitative information about Level 3 Fair Value Measurements:

American Beacon DoubleLine Floating Rate Fund	Fair Value as of March 31, 2026	Valuation Techniques	Unobservable Input	Unobservable Input Values (Weighted Average)	Impact to valuation from an increase to input
Foreign Common Stocks . . . . .	\$ 85,420	Market Comparables	Market Quotes	\$ 16.895	Significant changes in the market quotes would have resulted in direct and proportional changes in the fair value of the security

## Schedule of Investments

March 31, 2026

	Shares	Fair Value
SHORT-TERM INVESTMENTS - 1.2% (Cost \$4,407,812)		
Investment Companies - 1.2%		
American Beacon U.S. Government Money Market Select Fund, 3.56% <sup>E F</sup> . . . . .	4,407,812	\$ 4,407,812
<b>TOTAL INVESTMENTS - 98.9% (Cost \$356,611,198)</b>		<b>351,884,022</b>
<b>OTHER ASSETS, NET OF LIABILITIES - 1.1%</b>		<b>3,988,936</b>
<b>TOTAL NET ASSETS - 100.0%</b>		<b>\$ 355,872,958</b>

Percentages are stated as a percent of net assets.

<sup>A</sup> Security exempt from registration under the Securities Act of 1933. These securities may be resold to qualified institutional buyers pursuant to Rule 144A. At the period end, the value of these securities amounted to \$181,425,972 or 51.0% of net assets. The Fund has no right to demand registration of these securities.

<sup>B</sup> Security has been fair valued pursuant to the Manager's procedures related to pricing that is not available after the close of exchange or the available price does not reflect the security's true market value. At period end, the value of these securities amounted to \$10,443,513 or 2.9% of net assets.

<sup>C</sup> Value was determined using significant unobservable inputs.

<sup>D</sup> Reg S - Security purchased under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States. Such a security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration.

<sup>E</sup> The Fund is affiliated by having the same investment advisor.

<sup>F</sup> 7-day yield.

DAC - Designated Activity Company.

LLC - Limited Liability Company.

LP - Limited Partnership.

PJSC - Public Joint Stock Company.

The Fund's investments are summarized by level based on the inputs used to determine their values. As of March 31, 2026, the investments were classified as described below:

DoubleLine Select Income Fund	Level 1	Level 2	Level 3	Total
<b>Assets</b>				
Corporate Obligations . . . . .	\$ -	\$ 145,567,335	\$ 10,443,513	\$ 156,010,848
Foreign Corporate Obligations . . . . .	-	14,041,999	-	14,041,999
Asset-Backed Obligations . . . . .	-	152,742,425	-	152,742,425
U.S. Treasury Obligations . . . . .	-	24,680,938	-	24,680,938
Short-Term Investments . . . . .	4,407,812	-	-	4,407,812
Total Investments in Securities - Assets . . . . .	<u>\$ 4,407,812</u>	<u>\$ 337,032,697</u>	<u>\$ 10,443,513</u>	<u>\$ 351,884,022</u>

U.S. GAAP requires transfers between all levels to/from level 3 be disclosed. During the year ended March 31, 2026, one Foreign Corporate Obligation was transferred out of Level 3 to Level 2 with a fair value of \$1,618,366.

The following table is a reconciliation of Level 3 assets within the Fund for which significant unobservable inputs were used to determine fair value. Transfers in or out of Level 3 represent the ending value of any security or instrument where a change in the level has occurred from the beginning to the end of the year:

Security Type	Balance as of 3/31/2025	Purchases	Sales	Maturity/ Settlement	Accrued Discounts (Premiums)	Realized Gain (Loss)	Change in Unrealized Appreciation (Depreciation)	Transfer into Level 3	Transfer out of Level 3	Balance as of 3/31/2026	Unrealized Appreciation (Depreciation) at Year End*
Corporate Obligations . . . . .	\$5,154,000	\$5,500,000	\$128,332	-	\$ (417)	\$ (1,217)	\$ (80,521)	-	-	\$10,443,513	\$ 73,479
Foreign Corporate Obligations . . . . .	<u>2,474,761</u>	-	451,522	313,884	5,202	2,953	(99,144)	-	1,618,366	-	-
	<u>\$7,628,761</u>	<u>\$5,500,000</u>	<u>\$579,854</u>	<u>313,884</u>	<u>\$ 4,785</u>	<u>\$ 1,736</u>	<u>\$ (179,665)</u>	<u>\$ -</u>	<u>\$1,618,366</u>	<u>\$10,443,513</u>	<u>\$ 73,479</u>

\* Change in unrealized appreciation (depreciation) attributable to Level 3 securities held at year end. This balance is included in the change in unrealized appreciation (depreciation) on the Statements of Operations

## Schedule of Investments

March 31, 2026

For the year ended March 31, 2026, three corporate obligations have been fair valued at \$10,443,513 by the Valuation Committee using significant unobservable inputs.

The following is a summary of quantitative information about Level 3 Fair Value Measurements:

American Beacon DoubleLine Select Income Fund	Fair Value as of March 31, 2026	Valuation Techniques	Unobservable Input	Unobservable Input Values (Weighted Average)	Impact to valuation from an increase to input
Corporate Bonds . . . . .	\$ 10,443,512	Market Comparables	Market Quotes	\$98.57-\$104.49 (\$100.69)	Significant changes in the market quotes would have resulted in direct and proportional changes in the fair value of the security

## Notes to Financial Statements

March 31, 2026

---

### 1. Organization and Significant Accounting Policies

American Beacon Funds (the “Trust”) is organized as a Massachusetts business trust. The Funds, each a series within the Trust, are registered under the Investment Company Act of 1940, as amended (the “Act”), as diversified, open-end management investment companies. As of March 31, 2026, the Trust consists of twenty-seven active series, two of which are presented in this filing: American Beacon DoubleLine Floating Rate Fund and American Beacon DoubleLine Select Income Fund (collectively, the “Funds” and each individually a “Fund”). The remaining twenty-five active series are reported in separate filings.

American Beacon Advisors, Inc. (the “Manager”) is a Delaware corporation and a wholly-owned subsidiary of Resolute Investment Managers, Inc. (“RIM”) organized in 1986 to provide business management, advisory, administrative, and asset management consulting services to the Trust and other investors. The Manager is registered as an investment advisor under the Investment Advisers Act of 1940, as amended (the “Advisers Act”). The Manager is an indirect wholly-owned subsidiary of Resolute Topco, Inc. (“Topco”), which is owned primarily by various institutional investment funds that are managed by financial institutions and other investment advisory firms. No owner of Topco owns 25% or more of the outstanding equity or voting interests of Topco.

#### *Fund Reorganizations*

On August 25, 2025, the Board of Trustees (the “Board”) of the American Beacon Funds (the “Trust”) approved a Plan of Reorganization and Termination (the “Reorganization Plan”) pursuant to which the DoubleLine Floating Rate Fund (the “Acquired Floating Rate Fund”), a series of DoubleLine Funds Trust, would be reorganized into the American Beacon DoubleLine Floating Rate Income Fund (the “Acquiring Floating Rate Fund”), a series of the Trust (the “Reorganization”). The Board has subsequently approved the following additional matters in connection with the Reorganization: (1) a change in the name of the Fund to the American Beacon DoubleLine Floating Rate Fund; and (2) a reverse share split of the shares of each class of the Fund to align with the net asset value (“NAV”) per share of the Acquiring Floating Rate Fund as of the closing NAV on February 20, 2026 (the “Closing Date”).

On the Closing Date, the Acquiring Floating Rate Fund effected a reverse share split (the “Reverse Share Split”) of the shares of each class of the Fund immediately prior to the Reorganization. The NAV per share of the A Class, C Class and Investor Class shares of the Fund aligned with that of the Class N shares of the Acquired Floating Rate Fund, and the NAV per share of the Y Class and R5 Class shares of the Fund aligned with that of the Class I shares of the Acquired Floating Rate Fund.

Pursuant to the Reorganization Plan approved by the Board, the Acquired Fund was reorganized into the Acquiring Fund on February 20, 2026. In connection with the reorganization, each shareholder of the Acquired Fund received Acquiring Fund shares equal in value to the number of Acquired Fund shares owned on the Closing Date. The Acquiring Fund has the same investment advisor, investment objective and fundamental investment policies, and a substantially similar investment strategy, as the Acquired Fund. The Y Class shares of the Acquiring Floating Rate Fund have adopted the performance history and financial statements of the Class I shares of the Acquired Floating Rate Fund, and the Investor Class shares of the Acquiring Floating Rate Fund have adopted the performance history and financial statements of the Class N shares of the Acquired Floating Rate Fund. No sales loads, commissions or other transactional fees were imposed on shareholders in connection with the exchange of their shares. Effective as of the Closing Date, the Acquired Fund ceased operations.

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

Class shares outstanding, net assets applicable to each class and NAV per share outstanding immediately before the Reorganization were as follows:

Share Class	Pre-Split NAV	Post-Split NAV	Reverse Split Ratio	Net Asset Acquired	Exchanged Shares of Acquiring Fund Issued	Value of Exchanged Shares	Acquiring Fund's Shares Outstanding as of February 20, 2026	Acquired Fund's Net Assets before acquisition	Acquired Fund's Shares Outstanding as of February 20, 2026
R5	\$ 7.2207	\$ 8.9310	0.8085	\$ 10,966,815	1,227,949	\$ 10,966,815	1,227,949	-	-
Y	7.2256	8.9310	0.8090	22,648,160	2,535,904	22,648,160	2,535,904	\$ 80,894,713	9,057,789
Investor	7.1923	8.9581	0.8029	5,727,801	639,399	5,727,801	639,399	12,164,839	1,357,977
A	7.2102	8.9581	0.8049	7,510,540	838,408	7,510,540	838,408	-	-
C	7.2298	8.9581	0.8071	4,459,647	497,834	4,459,647	497,834	-	-

The Reorganization was structured to qualify as a tax-free reorganization under the Internal Revenue Code for federal income tax purposes.

Class shares outstanding, net assets applicable to each class and NAV per share outstanding immediately after the Reorganization were as follows:

Acquiring Fund Class - After Reorganization	Shares Outstanding	Net Assets	NAV Per Share
R5	1,227,949	\$ 10,966,815	\$ 8.9310
Y	11,593,693	103,542,873	8.9310
Investor	1,997,376	17,892,640	8.9581
A	838,408	7,510,540	8.9581
C	497,834	4,459,647	8.9581

The cost, fair value and net unrealized appreciation (depreciation) of the investments of the Acquiring Floating Rate Fund immediately before the date of Reorganization, were as follows:

#### Acquiring Fund - Prior to Reorganization

Cost of investments	\$ 50,452,016
Fair value of investments	47,624,844
Net unrealized appreciation of investments	(2,827,172)

For financial reporting purposes, assets received and shares issued by the Acquiring Floating Rate Fund were recorded at fair value; however, the cost basis of the investments received from the Acquired Floating Rate Fund were carried forward to align ongoing reporting of the Acquiring Floating Rate Fund's realized and unrealized gains and losses with the amount distributable to shareholders for tax purposes.

Assuming the Reorganization had been completed on April 1, 2025, the beginning of the Acquiring Floating Rate Fund's current fiscal period, the pro forma results of operations for the current fiscal period would have been as follows:

#### Acquiring Fund - Pro Forma Results from Operations

Net investment income	\$ 9,242,196
Net realized and unrealized gains	(8,542,513)
Change in net assets resulting in operations	699,683

Because the combined investment portfolios for the Reorganization have been managed as a single integrated portfolio since the Reorganization was completed, it is not practicable to separate the amounts of revenue and earnings of the Acquired Floating Rate Fund that have been included in the Statements of Operations for the Acquiring Floating Rate Fund since the Reorganization was consummated.

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

On August 25, 2025, the Board approved a Plan of Reorganization and Termination (the “Plan”) to reorganize DoubleLine Infrastructure Income Fund (the “Acquired Income Fund”), a series of the DoubleLine Funds Trust, into American Beacon DoubleLine Select Income Fund, (the “Acquiring Income Fund”), a newly-created series of the Trust (the said transaction, a “Reorganization”).

On February 20, 2026, pursuant to the Plan, the Acquired Income Fund transferred all its property and assets to the Acquiring Income Fund, in exchange solely for voting shares of the Acquiring Income Fund and the assumption of all the Acquired Income Fund’s liabilities. Shareholders of the Acquired Income Fund became shareholders of the Acquiring Income Fund, in which they received shares of the Acquiring Income Fund equal in value to the shares of the Acquired Income Fund held by the shareholders immediately prior to the Reorganization.

The accounting and performance history of the I Shares and N Shares of Acquired Income Fund were redesignated as that of the Y Class shares and Investor Class, respectively, of American Beacon DoubleLine Select Income Fund with the same aggregate value. The R6 Class of the Fund commenced operations on February 23, 2026.

The Reorganization was structured to qualify as a tax-free reorganization under the Internal Revenue Code for federal income tax purposes. As such, the Acquired Funds’ shareholders recognized no gain or loss for federal income tax purposes.

The shares, net assets, net investment income, and net unrealized appreciation (depreciation) of the investments of the Acquired Income Fund, as of the close of business on February 20, 2026 were as follows:

Y Class Shares		37,136,780
Investor Class Shares		935,907
Net Assets - Y Class	\$	357,430,438
Net Assets - Investor Class	\$	9,015,573
Net Investment Income	\$	8,986,452
Unrealized Appreciation	\$	3,358,631

The Acquiring Fund is designed to be substantially similar from an investment perspective to the Acquired DoubleLine Fund. The Reorganizations shifted the management oversight responsibility from DoubleLine Capital LP. (the “Advisor” when used to refer to the Acquired Fund) to the Manager. The Manager engaged DoubleLine Capital LP (the “Sub-Advisor” when used to refer to the Acquiring Funds) as the sub-advisor to the Acquiring Funds, thus maintaining the continuity of the portfolio management.

For financial reporting purposes, assets received and shares issued by the Acquiring Income Fund were recorded at fair value; however, the cost basis of the investments received from the Acquired Income Fund was carried forward to align ongoing reporting of the Acquiring Income Fund’s realized and unrealized gains and losses with the amount distributable to shareholders for tax purposes.

## Notes to Financial Statements

March 31, 2026

### Class Disclosure

Each Fund has multiple classes of shares designed to meet the needs of different groups of investors; however, not all of the Funds offer all classes. The following table sets forth the differences amongst the classes:

Class	Eligible Investors	Minimum Initial Investments
R5 Class	Large institutional investors - sold directly or through intermediary channels.	\$250,000
Y Class	Large institutional retirement plan investors - sold directly or through intermediary channels.	\$100,000
Investor Class	All investors using intermediary organizations, such as broker-dealers or retirement plan sponsors - sold directly through intermediary channels.	\$ 2,500
A Class	All investors who invest through intermediary organizations, such as broker-dealers or third party administrator. Retail investors who invest directly through a financial intermediary, such as a broker, bank, or registered investment advisor which may include a front-end sales charge and a contingent deferred sales charge ("CDSC").	\$ 2,500
C Class	Retail investors who invest directly through a financial intermediary, such as a broker or through employee directed benefit plans with applicable sales charges which may include CDSC.	\$ 1,000
R6 Class	Large institutional retirement plan investors—sold through retirement plan sponsors.	None

Each class offered by the Trust has equal rights as to assets and voting privileges. Income and non-class specific expenses are allocated daily to each class based on the relative net assets. Realized and unrealized capital gains and losses of each class are allocated daily based on the relative net assets of each class of the respective Fund. Class specific expenses, where applicable, currently include service, distribution, transfer agent fees, and sub-transfer agent fees that vary amongst the classes as described more fully in Note 2.

### Significant Accounting Policies

The following is a summary of significant accounting policies, consistently followed by the Funds in preparation of the financial statements. The Funds are considered investment companies and accordingly, follow the investment company accounting and reporting guidance of the FASB Accounting Standards Codification Topic 946, *Financial Services - Investment Companies*, a part of Generally Accepted Accounting Principles ("U.S. GAAP").

An operating segment is defined in Topic 280 as a component of a public entity that engages in business activities from which it may recognize revenues and incur expenses, has operating results that are regularly reviewed by the public entity's chief operating decision maker ("CODM") to make decisions about resources to be allocated to the segment and assess its performance, and has discrete financial information available. The President of the American Beacon Funds acts as the Funds' CODM. The Funds represent a single operating segment, as the CODM monitors the operating results of the Funds' as a whole and the Funds' long-term strategic asset allocation is pre-determined in accordance with the terms of its prospectus, based on a defined investment strategy which is executed by the Funds' portfolio managers as a team. The financial information in the form of the Funds' portfolio composition, total returns, expense ratios and changes in net assets (i.e., changes in net assets resulting from operations, subscriptions and redemptions), which are used by the CODM to assess the segment's performance versus the Funds' comparative benchmarks and to make resource allocation decisions for the Funds' single segment, is consistent with that presented within the Funds' financial statements. Segment assets are reflected on the accompanying statement of assets and liabilities as "total assets" and significant segment expenses are listed on the accompanying statement of operations.

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

### *Security Transactions and Investment Income*

Security transactions are recorded as of the trade date for financial reporting purposes. Securities purchased or sold on a when-issued or delayed-delivery basis may be settled beyond a standard settlement period for the security after the trade date.

Dividend income, net of foreign taxes, is recorded on the ex-dividend date, except certain dividends from foreign securities which are recorded as soon as the information is available to the Funds. Interest income, net of foreign taxes, is earned from settlement date, recorded on the accrual basis, and adjusted, if necessary, for accretion of discounts and amortization of premiums. For convertible securities, premiums attributable to the conversion feature are not amortized. Realized gains (losses) from securities sold are determined on the basis of specific lot identification. Estimated tax liabilities on certain foreign securities are recorded on an accrual basis and are reflected as components of interest income or net change in unrealized appreciation (depreciation) on investments on the Statements of Operations, as appropriate. Tax liabilities realized as a result of such security sales are reflected as a component of net realized gain (loss) on investments on the Statements of Operations. Paydown gains (losses) on mortgage-related and other asset-backed securities, if any, are recorded as components of interest income on the Statements of Operations. Income or short-term capital gain distributions received from registered investment companies, if any, are recorded as dividend income. Long-term gain distributions received from registered investment companies, if any, are recorded as realized gains.

Debt obligations may be placed on a non-accrual status and related interest income may be reduced by ceasing current accruals and writing off interest receivable when the collection of all or a portion of interest has become doubtful based on consistently applied procedures. A debt obligation is removed for non-accrual when the issuer resumes interest payments or when collectability of interest is probable. Realized gains (losses) from securities sold are determined on the basis of specific lot identification.

### *Currency Translation*

All assets and liabilities initially expressed in foreign currency values are converted into U.S. dollar values at the mean of the bid and ask prices of such currencies against U.S. dollars as last quoted by a recognized dealer. Income, expenses, and purchases and sales of investments are translated into U.S. dollars at the rate of the exchange prevailing on the respective dates of such transactions. The effect of changes in foreign currency exchange rates on investments is separately identified from the fluctuations arising from changes in market values of securities held and is reported with all other foreign currency gains and losses on the Funds' Statements of Operations.

### *Distributions to Shareholders*

The Funds distribute most or all of their net earnings and realized gains, if any, each taxable year in the form of dividends from net investment income on a monthly basis and distributions of realized net capital gains and net gains or losses from foreign currency transactions on an annual basis. The Funds do not have a fixed dividend rate and do not guarantee that they will pay any distributions in any particular period. Dividends to shareholders are determined in accordance with federal income tax regulations, which may differ in amount and character from net investment income and realized gains recognized for purposes of U.S. GAAP. To the extent necessary to fully distribute capital gains, the Funds may designate earnings and profits distributed to shareholders on the redemption of shares.

### *Commission Recapture*

The Funds have established brokerage commission recapture arrangements with certain brokers or dealers. If the Funds' investment advisor chooses to execute a transaction through a participating broker, the broker rebates a portion of the commission back to the Funds. Any collateral benefit received through participation in the commission recapture program is directed exclusively to the Funds. This amount is reported with the net realized gain (loss) in the Funds' Statements of Operations, if applicable.

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

### *Allocation of Income, Trust Expenses, Gains, and Losses*

Investment income and realized and unrealized gains and losses from investments of the Funds are allocated daily to each class of shares based upon the relative proportion of net assets of each class to the total net assets of the Funds. Expenses directly charged or attributable to a Fund will be paid from the assets of a Fund. Generally, expenses of the Trust will be allocated among and charged to the assets of the Funds on a basis that the Trust's Board deems fair and equitable, which may be based on the relative net assets of the Funds or nature of the services performed and relative applicability to the Funds.

### *Use of Estimates*

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimated.

### *Other*

Under the Trust's organizational documents, its officers and trustees are indemnified against certain liabilities arising out of the performance of their duties to the Trust. In the normal course of business, the Trust enters into contracts that provide indemnification to the other party or parties against potential costs or liabilities. The Trust's maximum exposure under these arrangements is dependent on claims that may be made in the future and, therefore, cannot be estimated. The Trust has had no prior claims or losses pursuant to any such agreement.

## **2. Transactions with Affiliates**

### *Management and Investment Sub-Advisory Agreements*

The Funds and the Manager are parties to a Management Agreement that obligates the Manager to provide the Funds with investment advisory and administrative services. As compensation for performing the duties under the Management Agreement, the Manager will receive an annualized management fee based on a percentage of each Fund's average daily net assets that is calculated and accrued daily according to the following schedule:

#### **DoubleLine Floating Rate Fund**

First \$170 million .....	0.10%
Over \$170 million .....	0.15%

#### **DoubleLine Select Income Fund**

All assets on closing date .....	0.10%
Next \$50 million .....	0.10%
All assets thereafter .....	0.15%

The Trust, on behalf of the Funds, and the Manager have entered into an Investment Advisory Agreement with DoubleLine Capital LP pursuant to which the Funds have agreed to pay an annualized sub-advisory fee that is calculated and accrued daily based on the Funds' average daily net assets according to the following schedules:

#### **DoubleLine Floating Rate Fund**

First \$170 million .....	0.40%
All assets thereafter .....	0.35%

#### **DoubleLine Select Income Fund**

All assets on closing date .....	0.40%
Next \$50 million .....	0.40%
All assets thereafter .....	0.35%

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

The Management and Sub-Advisory Fees paid by the Funds for the year ended March 31, 2026 were as follows:

### DoubleLine Floating Rate Fund

	<u>Effective Fee Rate</u>	<u>Amount of Fees Paid</u>
Management Fees .....	0.10%	\$ 14,392
Sub-Advisory Fees .....	0.40%	580,483*
Total .....	<u>0.50%</u>	<u>\$ 594,875</u>

### DoubleLine Select Income Fund

	<u>Effective Fee Rate</u>	<u>Amount of Fees Paid</u>
Management Fees .....	0.10%	\$ 52,241
Sub-Advisory Fees .....	0.40%	1,710,228*
Total .....	<u>0.50%</u>	<u>\$ 1,762,469</u>

\* Includes fees paid prior to the reorganization on February 20, 2026.

### Distribution Plans

Separate Distribution Plans (the “Distribution Plans”) have been adopted pursuant to Rule 12b-1 under the Act for the A and C Classes of the DoubleLine Floating Rate Fund. Under the Distribution Plans, as compensation for distribution and shareholder servicing assistance, the Manager receives an annual fee up to 0.25% of the average daily net assets of the A Class and up to 1.00% of the average daily net assets of the C Class. The fee will be payable without regard to whether the amount of the fee is more or less than the actual expenses incurred in a particular month by the Manager for distribution assistance.

### Service Plans

The Manager and the Trust entered into Service Plans that obligate the Manager to oversee additional shareholder servicing of the Investor, A, and C Classes of the Funds. As compensation for performing the duties required under the Service Plans, the Manager receives an annualized fee up to 0.25% of the average daily net assets of the A and C Classes and up to 0.375% of the average daily net assets of the Investor Class of the Funds.

### Sub-Transfer Agent Fees

The Manager has entered into agreements, which include servicing agreements, with financial intermediaries that provide recordkeeping, processing, shareholder communications and other services to customers of the intermediaries that hold positions in the R5 and Y Classes of the Funds and has agreed to compensate the intermediaries for providing these services. Intermediaries transact with the Funds primarily through the use of omnibus accounts on behalf of their customers who hold positions in the Funds. Certain services would have been provided by the Funds’ transfer agent and other service providers if the shareholders’ accounts were maintained directly by the Funds’ transfer agent. Accordingly, the Funds, pursuant to Board approval, have agreed to reimburse the Manager for certain non-distribution shareholder services provided by financial intermediaries for the R5 and Y Classes. The reimbursement amounts (sub-transfer agent fees) paid to the Manager are subject to a fee limit of up to 0.10% of an intermediary’s average net assets in the R5 and Y Classes on an annual basis. During the year ended March 31, 2026, the sub-transfer agent fees, as reflected in “Transfer agent fees” on the Statements of Operations, were as follows:

<u>Fund</u>	<u>Sub-Transfer Agent Fees</u>
DoubleLine Floating Rate Fund .....	\$ 79,056
DoubleLine Select Income Fund .....	87,699

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

As of March 31, 2026, the Funds owed the Manager the following reimbursement of sub-transfer agent fees, as reflected in “Transfer agent fees payable” on the Statements of Assets and Liabilities:

Fund	Reimbursement Sub-Transfer Agent Fees
DoubleLine Floating Rate Fund .....	\$ 24,327
DoubleLine Select Income Fund .....	33,923

### Investments in Affiliated Funds

The Funds may invest in the American Beacon U.S. Government Money Market Select Fund (the “USG Select Fund”). Cash collateral received by the Funds in connection with securities lending may also be invested in the USG Select Fund. The Funds listed below held the following shares with a March 31, 2026 fair value and dividend income earned from the investment in the USG Select Fund.

Affiliated Security	Type of Transaction	Fund	March 31, 2026 Shares/Principal	Change in Unrealized Gain (Loss)	Realized Gain (Loss)	Dividend Income	March 31, 2026 Fair Value
U.S. Government Money Market Select .....	Direct	DoubleLine Floating Rate Fund	\$ 13,198,054	\$ -	\$ -	\$ 29,763	\$ 13,198,054
U.S. Government Money Market Select .....	Direct	DoubleLine Select Income Fund	4,407,812	-	-	36,655	4,407,812

The Funds and the USG Select Fund have the same investment advisor and therefore, are considered to be affiliated. The Manager serves as investment advisor to the USG Select Fund and receives management fees and administrative fees totaling 0.10% of the average daily net assets of the USG Select Fund. During the year ended March 31, 2026, the Manager earned fees on the Funds’ direct investments in the USG Select Fund as shown below:

Fund	Direct Investments in USG Select Fund
DoubleLine Floating Rate Fund .....	\$ 575
DoubleLine Select Income Fund .....	1,000

### Interfund Credit Facility

Pursuant to an exemptive order issued by the U.S. Securities and Exchange Commission (“SEC”), the Funds, along with other registered investment companies having management contracts with the Manager, may participate in a credit facility whereby each fund, under certain conditions, is permitted to lend money directly to and borrow directly from other participating funds for temporary purposes. The interfund credit facility is advantageous to the funds because it provides added liquidity and eliminates the need to maintain higher cash balances to meet redemptions. This situation could arise when shareholder redemptions exceed anticipated volumes and certain funds have insufficient cash on hand to satisfy such redemptions or when sales of securities do not settle as expected, resulting in a cash shortfall for a fund. The credit facility provides a source of immediate, short-term liquidity pending settlement of the sale of portfolio securities. The credit facility is administered by a credit facility team consisting of professionals from the Manager’s asset management, compliance, and accounting areas who report the activities of the credit facility to the Board. During the year ended March 31, 2026, the DoubleLine Floating Rate Fund borrowed on average \$5,345,135 for 7 days at an average interest rate of 4.45% with interest charges of \$5,453. These amounts are recorded as “Loan interest expense” in the Statements of Operations. During the year ended March 31, 2026, the DoubleLine Select Income Fund did not utilize the credit facility.

### Expense Reimbursement Plan

Prior to the Reorganization dates, the Acquired DoubleLine Funds’ Advisor contractually agreed to waive fees and/or pay expenses of the Acquired DoubleLine Funds to ensure that total annual fund operating expenses

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

did not exceed 0.75% and 1.00% of the average daily net assets for the Acquired DoubleLine Funds' Class I shares and Class N shares, respectively (exchanged for Y Class and Investor Class shares, respectively). At the Reorganization date, the Acquired DoubleLine Funds' Advisor had waived and/or paid expenses of \$112,660 and \$17,194, for the Class I and Class N shares of the American Beacon DoubleLine Floating Rate Fund, respectively. The Manager contractually agreed to reduce fees and/ or reimburse expenses for the classes of the Funds, through February 20, 2028, to the extent that total operating expenses (excluding taxes, interest, brokerage commissions, acquired fund fees and expenses, securities lending fees, expenses associated with securities sold short, litigation, and other extraordinary expenses) exceed the expense cap. During the year ended March 31, 2026, the Manager waived and/or reimbursed expenses as follows:

Fund	Class	Expense Cap		Reimbursed Expenses	(Recouped) Expenses	Expiration of Reimbursed Expenses
		4/1/2025 - 2/20/2026	2/21/2026 - 3/31/2026			
DoubleLine Floating Rate Fund	R5*	-	0.69%	\$ 8,331	\$ -	2028-2029
DoubleLine Floating Rate Fund	Y	0.75%	0.75%	178,161	-	2028-2029
DoubleLine Floating Rate Fund	Investor	1.00%	1.00%	29,731	-	2028-2029
DoubleLine Floating Rate Fund	A*	-	0.95%	7,033	-	2028-2029
DoubleLine Floating Rate Fund	C*	-	1.73%	4,029	-	2028-2029
DoubleLine Select Income Fund	Y	0.65%	0.59%	73,010	-	2028-2029
DoubleLine Select Income Fund	Investor	0.90%	0.84%	2,433	-	2028-2029
DoubleLine Select Income Fund	R6*	-	0.58%	306	-	2028-2029

\* Commenced operations on February 20, 2026.

Of the above amounts, \$84,875 and \$58,325 were disclosed as a Receivable for expense reimbursement on the Statements of Assets and Liabilities at March 31, 2026 for the DoubleLine Floating Rate Fund and DoubleLine Select Income Fund, respectively.

The Funds have adopted an Expense Reimbursement Plan whereby the Manager may seek repayment of contractual or voluntary fee reductions and expense reimbursements. Under the policy, the Manager can be reimbursed by the Funds for any contractual or voluntary fee reductions or expense reimbursements if reimbursement to the Manager (a) occurs within three years from the date of the Manager's waiver/reimbursement and (b) does not cause the Funds' annual operating expenses to exceed the lesser of the contractual percentage limit in effect at the time of the waiver/reimbursement or time of recoupment. The reimbursed expenses listed above will expire in 2028 and 2029. The Funds did not record a liability for potential contingent reimbursements due to the current assessment that reimbursements are uncertain. The carryover of excess expenses potentially reimbursable to the Manager, but not recorded as a liability are as follows:

Fund	Recouped Expenses	Excess Expense Carryover	Expired Expense Carryover	Expiration of Reimbursed Expenses
DoubleLine Floating Rate Fund	\$ -	\$ -	\$ 6,367	2027-2028

### Sales Commissions

The Funds' Distributor, Resolute Investment Distributors, Inc. ("RID" or "Distributor"), may receive a portion of A Class sales charges from broker dealers which may be used to offset distribution related expenses. During the year ended March 31, 2026, there were no Class A sales charges collected for the DoubleLine Floating Rate Fund.

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

A CDSC of 1% will be deducted with respect to A Class Shares of the DoubleLine Select Income Fund on certain purchases of \$500,000 or more that are redeemed in whole or part within 18 months of purchase, unless waived as discussed in the Fund's Prospectus. Any applicable CDSC will be 0.50% of the lesser of the original purchase price or the value of the redemption of the A Class Shares redeemed. During the year ended March 31, 2026, there were no CDSC fees collected for the A Class Shares of DoubleLine Floating Rate Fund.

A CDSC of 1.00% will be deducted with respect to C Class Shares redeemed within 12 months of purchase, unless waived as discussed in the Fund's Prospectus. Any applicable CDSC will be 1.00% of the lesser of the original purchase price or the value of the redemption of the C Class Shares redeemed. During the year ended March 31, 2026, CDSC fees of \$11 were collected for the C Class Shares of DoubleLine Floating Rate Fund.

### *Concentration of Ownership*

From time to time, the Funds may have a concentration of one or more accounts constituting a significant percentage of shares outstanding. Investment activities by holders of accounts that represent a significant ownership of more than 5% of the Funds' outstanding shares could have a material impact on the Funds. As of March 31, 2026, one shareholder has been identified as representing an affiliated significant ownership of approximately 73% for the DoubleLine Select Income Fund.

### *Trustee Fees and Expenses*

As compensation for their service to the American Beacon Funds Complex, including the Trust (collectively, the "Trusts"), each Trustee is compensated from the Trusts as follows: (1) an annual retainer of \$165,000; (2) meeting attendance fee (for attendance in-person or via teleconference) of (a) \$12,000 for in-person attendance, or \$5,000 for telephonic attendance, by Board members for each regularly scheduled or special Board meeting, (b) \$2,500 for attendance by Committee members at meetings of the Audit and Compliance Committee and the Investment Committee, (c) \$1,000 for attendance by Committee members at meetings of the Nominating and Governance Committee; and (d) \$2,500 for attendance by Board members for each special telephonic Board meeting; and (3) reimbursement of reasonable expenses incurred in attending Board meetings, Committee meetings, and relevant educational seminars. For this purpose, the Board considers attendance at regular meetings held by video conference to constitute in-person attendance at a Board meeting. The Trustees also may be compensated for attendance at special Board and/or Committee meetings from time to time. For his service as Board Chair, Mr. Doug Lingren receives an additional annual retainer of \$50,000. Although he attends several committee meetings at each quarterly Board meeting, he receives a single \$2,500 fee each quarter for his attendance at the Audit and Compliance Committee and Investment Committee meetings. The chairpersons of the Audit and Compliance Committee and the Investment Committee each receive an additional annual retainer of \$25,000 and the Chair of the Nominating and Governance Committee receives an additional annual retainer of \$10,000.

## **3. Security Valuation and Fair Value Measurements**

The price of each Fund's shares is based on its net asset value ("NAV") per share. Each Fund's NAV is computed by adding total assets, subtracting all the Fund's liabilities, and dividing the result by the total number of shares outstanding.

The NAV of each class of a Fund's shares is determined based on a pro rata allocation of a Fund's investment income, expenses and total capital gains and losses. A Fund's NAV per share is determined each business day as of the regular close of trading on the New York Stock Exchange ("NYSE" or "Exchange"), which is typically 4:00 p.m. Eastern Time ("ET"). However, if trading on the NYSE closes at a time other than 4:00 p.m. ET, a Fund's NAV per share typically would still be determined as of the regular close of trading on the NYSE. The Funds do not price their shares on days that the NYSE is closed. Foreign exchanges may permit trading in foreign securities on days when a Fund is not open for business, which may result in the value of a Fund's portfolio investments being affected at a time when you are unable to buy or sell shares.

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

Equity securities, including shares of closed-end funds and exchange-traded funds (“ETFs”), are valued at the last sale price or official closing price taken from the primary exchange in which each security trades. Investments in other mutual funds are valued at the closing NAV per share on the day of valuation. Debt securities are valued at bid quotes from broker/dealers or evaluated bid prices from pricing services, who may consider a number of inputs and factors, such as prices of comparable securities, yield curves, spreads, credit ratings, coupon rates, maturity, default rates, and underlying collateral. Futures are valued based on their daily settlement prices. Exchange-traded and over-the-counter (“OTC”) options are valued at the last sale price. Options with no last sale for the day are priced at mid quote. Swaps are valued at evaluated mid prices from pricing services.

The valuation of securities traded on foreign markets and certain fixed-income securities will generally be based on prices determined as of the earlier closing time of the markets on which they primarily trade unless a significant event has occurred. When a Fund holds securities or other assets that are denominated in a foreign currency, a Fund will normally use the currency exchange rates as of 4:00 p.m. ET.

Rule 2a-5 under the Investment Company Act (the “Valuation Rule”) establishes requirements for determining fair value in good faith for purposes of the Investment Company Act, including related oversight and reporting requirements. The Valuation Rule also defines when market quotations are “readily available,” which is the threshold for determining whether a Fund must fair value a security. Among other things, the Valuation Rule permits the Board to designate the Manager as Valuation Designee to perform the Fund’s fair value determinations subject to board oversight and certain reporting and other requirements intended to ensure that the Board receives the information it needs to oversee the Manager’s fair value determinations. Effective September 8, 2022, the Board has designated the Manager as valuation designee to perform fair value functions in accordance with the requirements of the Valuation Rule.

Securities may be valued at fair value, as determined in good faith and pursuant to the Manager’s procedures, under certain limited circumstances. For example, fair value pricing will be used for fixed-income securities and when market quotations are not readily available or reliable, as determined by the Manager, such as when (i) trading for a security is restricted or stopped; (ii) a security’s trading market is closed (other than customary closings); or (iii) a security has been de-listed from a national exchange. A security with limited market liquidity may require fair value pricing if the Manager determines that the available price does not reflect the security’s true market value. In addition, if a significant event that the Manager determines to affect the value of one or more securities held by a Fund occurs after the close of a related exchange but before the determination of a Fund’s NAV, fair value pricing may be used on the affected security or securities. Securities of small-capitalization companies are also more likely to require a fair value determination using these procedures because they are more thinly traded and less liquid than the securities of larger-capitalization companies. The Funds may fair value securities as a result of significant events occurring after the close of the foreign markets in which a Fund invests as described below. In addition, the Funds may invest in illiquid securities requiring these procedures.

A Fund may use fair value pricing for securities primarily traded in non-U.S. markets because most foreign markets close well before a Fund’s pricing time of 4:00 p.m. ET. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, may have occurred in the interim and may materially affect the value of those securities. If the Manager determines that the last quoted prices of non-U.S. securities will, in its judgment, materially affect the value of some or all a Fund’s portfolio securities, the Manager can adjust the previous closing prices to reflect what it believes to be the fair value of the securities as of the close of the Exchange. In deciding whether it is necessary to adjust closing prices to reflect fair value, the Manager reviews a variety of factors, including developments in foreign markets, the performance of U.S. securities markets, and the performance of instruments trading in U.S. markets that represent foreign securities and baskets of foreign securities. These securities are fair valued using a pricing service, using methods approved by the Manager, that considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant American Depositary Receipts (“ADRs”) and futures contracts. The Manager’s Valuation Committee may also fair value securities in other situations, such as when a particular foreign market is closed but a Fund is open.

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

A Fund uses outside pricing services to provide closing prices and information to evaluate and/or adjust those prices. As a means of evaluating its security valuation process, the Valuation Committee routinely compares closing prices, the next day's opening prices in the same markets and adjusted prices.

Attempts to determine the fair value of securities introduce an element of subjectivity to the pricing of securities. As a result, the price of a security determined through fair valuation techniques may differ from the price quoted or published by other sources and may not accurately reflect the market value of the security when trading resumes. If a reliable market quotation becomes available for a security formerly valued through fair valuation techniques, the Manager compares the new market quotation to the fair value price to evaluate the effectiveness of a Fund's fair valuation procedures. If any significant discrepancies are found, the Manager may adjust Manager's fair valuation procedures for a Fund.

### *Valuation Inputs*

Various inputs may be used to determine the fair value of the Funds' investments. These inputs are summarized in three broad levels for financial statement purposes. The inputs or methodologies used to value securities are not necessarily an indication of the risk associated with investing in those securities.

- Level 1 - Quoted prices in active markets for identical securities.
- Level 2 - Prices determined using other significant observable inputs. These may include quoted prices for similar securities, interest rates, prepayment speeds, credit risk, and others.
- Level 3 - Prices determined using other significant unobservable inputs. Unobservable inputs reflect a Fund's own assumptions about the factors market participants would use in pricing an investment.

### *Level 1 and Level 2 trading assets and trading liabilities, at fair value*

Common stocks, ETFs, preferred securities and financial derivative instruments, such as futures contracts that are traded on a national securities exchange, are stated at the last reported sale or settlement price on the day of valuation. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized as Level 1 of the fair value hierarchy. Preferred securities and other equities traded on inactive markets or valued by reference to similar instruments are generally categorized as Level 2 of the fair value hierarchy.

With respect to a Fund's investments that do not have readily available market quotations, the Board has designated the Manager as its valuation designee to perform fair valuations pursuant to Rule 2a-5 under the Act (the "Valuation Designee"). If market prices are not readily available or are deemed unreliable, the Valuation Designee will use the fair value of the security or other instrument as determined in good faith under policies and procedures established by and under the supervision of the Board ("Valuation Procedures"). Market prices are considered not readily available where there is an absence of current or reliable market-based data (e.g., trade information or broker quotes), including where events occur after the close of the relevant market, but prior to the NYSE Close, that materially affect the values of a Fund's portfolio holdings or assets. In addition, market prices are considered not readily available when, due to extraordinary circumstances, the exchanges or markets on which the securities or other instruments trade do not open for trading for the entire day and no other market prices are available. Fair value pricing is subjective in nature and the use of fair value pricing by the Valuation Designee may cause the NAV of a Fund's shares to differ significantly from the NAV that would have been calculated using market prices at the close of the exchange on which a portfolio holding is primarily traded. There can be no assurance that a Fund could obtain the fair value assigned to an investment if a Fund were to sell the investment at approximately the time at which a Fund determines its NAV.

Fixed-income securities including corporate, convertible and municipal bonds and notes, U.S. government agencies, U.S. Treasury obligations, sovereign issues, bank loans, convertible preferred securities, and non-U.S. bonds are normally valued by pricing service providers that use broker dealer quotations, reported trades or

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

valuation estimates from their internal pricing models. The service providers' internal models use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates, and quoted prices for similar assets. Securities that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy. Fixed-income securities purchased on a delayed-delivery basis are marked-to-market daily until settlement at the forward settlement date and are categorized as Level 2 of the fair value hierarchy.

Investments in registered open-end investment management companies will be valued based upon the NAVs of such investments and are categorized as Level 1 of the fair value hierarchy.

### *Level 3 trading assets and trading liabilities, at fair value*

The valuation techniques and significant inputs used in determining the fair values of financial instruments classified as Level 3 of the fair value hierarchy are as follows.

Securities and other assets for which market quotes are not readily available are valued at fair value as determined in good faith by the Manager or persons acting under their oversight and may be categorized as Level 3 of the fair value hierarchy.

Market quotes are considered not readily available in circumstances where there is an absence of current or reliable market-based data (e.g., trade information or broker quotes), including where events occur after the close of the relevant market, but prior to the Exchange close, that materially affect the values of a Fund's securities or assets. In addition, market quotes are considered not readily available when, due to extraordinary circumstances, the exchanges or markets on which the securities trade, do not open for trading for the entire day and no other market prices are available. The Board has designated the Manager as responsible for monitoring significant events that may materially affect the fair values of a Fund's securities or assets and for determining whether the value of the applicable securities or assets should be re-evaluated in light of such significant events.

The Manager has selected methods for valuing securities and other assets in circumstances where market quotes are not readily available, and oversees the application of those valuation methods. In the event that the security or asset cannot be valued, pursuant to one of the valuation methods selected by the Manager, the fair value of the security or asset will be determined in good faith by the Valuation Committee.

When a Fund uses fair valuation methods that use significant unobservable inputs to determine its NAV, the securities priced using this methodology are categorized as Level 3 of the fair value hierarchy. These methods may require subjective determinations about the value of a security. While the Trust's policy is intended to result in a calculation of a Fund's NAV that fairly reflects security values as of the time of pricing, the Trust cannot guarantee that values determined by the Manager or persons acting under their oversight would accurately reflect the price that a Fund could obtain for a security if it were to dispose of that security as of the time of pricing (for instance, in a forced or distressed sale). The prices used by a Fund may differ from the value that would be realized if the securities were sold.

## **4. Securities and Other Investments**

### *Bank Loans and Senior Loans*

Bank loans are fixed and floating rate loans arranged through private negotiations between a company or a non-U.S. government and one or more financial institutions (lenders). The Funds may invest in senior loans, which are floating rate loans, sometimes referred to as adjustable rate loans that hold a senior position in the capital structure of U.S. and foreign corporations, partnerships or other business entities. Under normal circumstances, senior loans have priority of claim ahead of other obligations of a borrower in the event of liquidation. Bank loans and senior loans may be collateralized or uncollateralized. They pay interest at rates that float above, or are

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

adjusted periodically based on, a benchmark that reflects current interest rates. The Funds may invest in such loans in the form of participations in loans and assignments of all or a portion of loans from third parties. The purchaser of an assignment typically succeeds to all the rights and obligations of the assigning institution and becomes a lender under the credit agreement with respect to the debt obligation; however, the purchaser's rights can be more restricted than those of the assigning institution, and, in any event, the Funds may not be able to unilaterally enforce all rights and remedies under the loan and with regard to any associated collateral. A participation typically results in a contractual relationship only with the institution participating out the interest, not with the borrower. In purchasing participations, the Funds generally will have no right to enforce compliance by the borrower with the terms of the loan agreement, nor any rights of set-off against the borrower, and the Funds may not benefit directly from any collateral supporting the loan in which it has purchased the participation. As a result, the Fund will be exposed to the credit risk of both the borrower and the institution selling the participation. When the Fund purchases assignments from lenders, it will acquire direct rights against the borrower on the loan.

As of March 31, 2026, the DoubleLine Floating Rate Fund had the following unfunded loan commitments which could be extended at the option of the borrower pursuant to the respective loan agreement:

<u>Borrower</u>	<u>Unfunded Loan Commitment</u>
GC Ferry Acquisition I, Inc. . . . .	\$ 48,125
Kaman Corporation . . . . .	61,629
Pinnacle Buyer LLC . . . . .	37,097
Pye-Barker Fire & Safety, LLC . . . . .	59,800
Savor Acquisition, Inc. . . . .	62,223
Total . . . . .	<u>\$ 268,874</u>

### *Common Stock*

Common stock generally takes the form of shares in a corporation which represent an ownership interest. It ranks below preferred stock and debt securities in claims for dividends and for assets of the company in a liquidation or bankruptcy. The value of a company's common stock may fall as a result of factors directly relating to that company, such as decisions made by its management or decreased demand for the company's products or services. A stock's value may also decline because of factors affecting not just the company, but also companies in the same industry or sector. The price of a company's stock may also be affected by changes in financial markets that are relatively unrelated to the company, such as changes in interest rates, currency exchange rates or industry regulation. Companies that elect to pay dividends on their common stock generally only do so after they invest in their own business and make required payments to bondholders and on other debt and preferred stock. Therefore, the value of a company's common stock will usually be more volatile than its bonds, other debt and preferred stock. Common stock may be exchange-traded or OTC. OTC stock may be less liquid than exchange-traded stock.

### *Convertible Securities*

Convertible securities are hybrid securities that combine the investment characteristics of bonds and common stocks. Convertible securities include corporate bonds, notes, preferred stock or other securities that may be converted into or exchanged for a prescribed amount of common stock of the same or a different issuer within a particular period of time at a specified price or formula. A convertible security entitles the holder to receive interest paid or accrued on debt or dividends paid on preferred stock until the convertible security matures or is redeemed, converted or exchanged. While no securities investment is without some risk, investments in convertible securities generally entail less risk than the issuer's common stock, although the extent to which such risk is reduced depends in large measure upon the degree to which the convertible security sells above its value as a fixed income security. The market value of convertible securities tends to decline as interest rates increase and, conversely, to increase as interest rates decline. While convertible securities generally offer lower interest or dividend yields than non-convertible debt securities of similar quality, they do enable the investor to benefit from increases in the market price of the underlying common stock. Holders of convertible securities have a claim on

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

the assets of the issuer prior to the common stockholders, but may be subordinated to holders of similar non-convertible securities of the same issuer. Because of the conversion feature, certain convertible securities may be considered equity equivalents.

### *Corporate Debt and Other Fixed-Income Securities*

The Funds may hold debt, including government and corporate debt, and other fixed-income securities. The investment return of corporate debt securities reflects interest earning and changes in the market value of the security. Typically, the values of fixed-income securities change inversely with prevailing interest rates. Therefore, a fundamental risk of fixed-income securities is interest rate risk, which is the risk that their value will generally decline as prevailing interest rates rise, which may cause a Fund's NAV to likewise decrease, and vice versa. How specific fixed-income securities may react to changes in interest rates will depend on specific characteristics of each security. Fixed-income securities are also subject to credit risk, which is the risk that the credit strength of an issuer of a fixed-income security will weaken and/or that the issuer will be unable to make timely principal and interest payments and that the security may go into default.

### *Delayed Funding Loans and Revolving Credit Facilities*

The Funds may enter into delayed funding loans and revolving credit facilities. Delayed funding loans and revolving credit facilities are borrowing arrangements in which the lender agrees to make loans up to a maximum amount upon demand by the borrower during a specific term. A revolving credit facility differs from a delayed funding loan in that as the borrower repays the loan, an amount equal to the repayment may be borrowed again during the term of the revolving credit facility. Delayed funding loans and revolving credit facilities usually provide for floating or variable rates of interest. These commitments may have the effect of requiring a Fund to increase its investment in a company at a time when it might not otherwise decide to do so (including at a time when the company's financial condition makes it unlikely that such amounts will be repaid). If a Fund's sub-advisor does not reasonably believe that the Fund will have sufficient cash and cash equivalents to meet all of its obligations related to delayed funding loans and revolving credit facilities when such obligations come due, then the sub-advisor is required to segregate or " earmark " liquid assets in an amount sufficient to meet such obligations.

The Funds may invest in delayed funding loans and revolving credit facilities with credit quality comparable to that of issuers of its securities investments. Delayed funding loans and revolving credit facilities may be subject to restrictions on transfer, and only limited opportunities may exist to resell such instruments. As a result, a Fund may be unable to sell such investments at an opportune time or may have to resell them at less than fair market value.

The Funds earn a commitment fee, typically set as a percentage of the commitment amount. Such fee income, which is included in "Interest income" on the Statements of Operations, is recognized ratably over the commitment period. Unfunded floating rate loan interests are marked-to-market daily, and any unrealized appreciation (depreciation) is included on the Statements of Assets and Liabilities and Statements of Operations.

### *Floating and Variable Rate Securities*

The coupons on certain fixed income securities in which the Funds may invest are not fixed and may fluctuate based upon changes in market rates. The coupon on a floating or variable rate security is generally based on an interest rate such as a money market index, LIBOR or a Treasury bill rate. Floating or variable rate obligations are less effective than fixed rate obligations at locking in a particular yield. Nevertheless, such obligations are subject to interest rate risk and may fluctuate in value in response to interest rate changes if there is a delay between changes in market interest rates and the interest reset date for the obligation, or for other reasons.

As short-term interest rates decline, the coupons on floating rate securities typically should decrease. Alternatively, during periods of increasing interest rates, changes in the coupons of floating rate securities may lag

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

behind changes in market rates or may have limits on the maximum increases in the coupon rates. The value of floating rate securities may decline if their coupons do not rise as much, or as quickly, as interest rates in general. Floating rate securities will not generally increase in value if interest rates decline.

In connection with floating rate loan interests, the Funds may also enter into unfunded floating rate loan interests (“commitments”). In connection with these commitments, the Funds earn a commitment fee, typically set as a percentage of the commitment amount. Such fee income, which is included in “Interest income” on the Statements of Operations, is recognized ratably over the commitment period. Unfunded floating rate loan interests are marked-to-market daily, and any unrealized appreciation (depreciation) is included on the Statements of Assets and Liabilities and Statements of Operations.

### *Foreign Debt Securities*

The Funds may each invest a significant portion of its assets in a particular geographic region or country, including emerging markets. The Funds may consider a country to be an emerging market country based on a number of factors including, but not limited to, if the country is classified as an emerging or developing economy by any supranational organization such as the World Bank, International Finance Corporation or the United Nations, or related entities, or if the country is considered an emerging market country for purposes of constructing emerging market indices. Sovereign debt securities are typically issued or guaranteed by national governments in order to finance the issuing country’s growth and/or budget. Investing in foreign sovereign debt securities will expose funds investing in such securities to the direct or indirect consequences of political, social or economic changes in the countries that issue the debt securities. Quasi-sovereign debt securities are debt securities either explicitly guaranteed by a foreign government or their agencies or whose majority shareholder is a foreign government. Supranational organizations are entities designated or supported by a government or governmental group to promote economic development. Supranational organizations have no taxing authority and are dependent on their members for payments of interest and principal. Obligations of a supranational entity may be denominated in foreign currencies.

### *Foreign Securities*

The Funds may invest in U.S. dollar-denominated and non-U.S. dollar denominated equity and debt securities of foreign issuers and foreign branches of U.S. banks, including negotiable certificates of deposit (“CDs”), bankers’ acceptances, and commercial paper. Foreign issuers are issuers organized and doing business principally outside the United States and include corporations, banks, non-U.S. governments, and quasi-governmental organizations. While investments in foreign securities may be intended to reduce risk by providing further diversification, such investments involve sovereign and other risks, in addition to the credit and market risks normally associated with domestic securities. These additional risks include the possibility of adverse political and economic developments (including political or social instability, nationalization, expropriation, or confiscatory taxation); the potentially adverse effects of unavailability of public information regarding issuers, different governmental supervision and regulation of financial markets, reduced liquidity of certain financial markets, and the lack of uniform accounting, auditing, and financial reporting standards or the application of standards that are different or less stringent than those applied in the United States; different laws and customs governing securities tracking; and possibly limited access to the courts to enforce the Funds’ rights as an investor.

### *High-Yield Bonds*

High-yield, non-investment-grade bonds (also known as “junk bonds”) are low-quality, high-risk corporate bonds that generally offer a high level of current income. These bonds are considered speculative by rating organizations. For example, Moody’s, S&P Global Ratings (“S&P Global”) and Fitch, Inc. rate them below Baa and BBB, respectively. High-yield bonds are often issued as a result of corporate restructurings, such as leveraged buyouts, mergers, acquisitions, or other similar events. They may also be issued by smaller, less creditworthy companies or by highly leveraged firms, which are generally less able to make scheduled payments of interest and principal than more financially stable firms. Because of their low credit quality, high-yield bonds must pay higher interest to compensate investors for the substantial credit risk they assume.

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

Lower-rated securities are subject to certain risks that may not be present with investments in higher-grade securities. Investors should consider carefully their ability to assume the risks associated with lower-rated securities before investing in a Fund. The lower rating of certain high yielding corporate income securities reflects a greater possibility that the financial condition of the issuer or adverse changes in general economic conditions may impair the ability of the issuer to pay income and principal. Changes by rating agencies in their ratings of a fixed income security also may affect the value of these investments. However, allocating investments in a Fund among securities of different issuers should reduce the risks of owning any such securities separately. The prices of these high yielding securities tend to be less sensitive to interest rate changes than higher-rated investments, but more sensitive to adverse economic changes or individual corporate developments. During economic downturns or periods of rising interest rates, highly leveraged issuers may experience financial stress that adversely affects their ability to service principal and interest payment obligations, to meet projected business goals or to obtain additional financing, and the markets for their securities may be more volatile. If an issuer defaults, a Fund may incur additional expenses to seek recovery. Additionally, accruals of interest income for a Fund may have to be adjusted in the event of default. In the event of an issuer's default, a Fund may write off prior income accruals for that issuer, resulting in a reduction in a Fund's current dividend payment. Frequently, the higher yields of high-yielding securities may not reflect the value of the income stream that holders of such securities may expect, but rather the risk that such securities may lose a substantial portion of their value as a result of their issuer's financial restructuring or default. Additionally, an economic downturn or an increase in interest rates could have a negative effect on the high-yield securities market and on the market value of the high-yield securities held by a Fund, as well as on the ability of the issuers of such securities to repay principal and interest on their borrowings.

### *Illiquid and Restricted Securities*

Generally, an illiquid asset is an asset that the Funds reasonably expect cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment, as determined pursuant to Rule 22e-4 under the Act or as otherwise permitted or required by SEC rules and interpretations. Historically, illiquid securities have included securities that have not been registered under the Securities Act, securities that are otherwise not readily marketable, and repurchase agreements having a remaining maturity of longer than seven calendar days. Securities that have not been registered under the Securities Act are referred to as private placements or restricted securities and are purchased directly from the issuer or in the secondary market. These securities may be sold only in a privately negotiated transaction or pursuant to an exemption from registration. Rule 144A, under the Securities Act, permits the sale of certain unregistered securities to qualified institutional buyers. To the extent privately placed securities held by a Fund qualify under Rule 144A and an institutional market develops for those securities, a Fund likely will be able to dispose of the securities without registering them under the Securities Act. To the extent that institutional buyers become, for a time, uninterested in purchasing these securities, investing in Rule 144A securities could increase the level of a Fund's illiquidity. The Manager or sub-advisor, as applicable, may determine that certain securities qualified for trading under Rule 144A are liquid. Regulation S under the Securities Act permits the sale abroad of securities that are not registered for sale in the United States and includes a provision for U.S. investors, such as a Fund, to purchase such unregistered securities if certain conditions are met. Securities sold in private placement offerings made in reliance on the "private placement" exemption from registration afforded by Section 4(a)(2) of the Securities Act and resold to qualified institutional buyers under Rule 144A under the Securities Act ("Section 4(a)(2) securities") are restricted as to disposition under the federal securities laws, and generally are sold to institutional investors, such as a Fund, that agree they are purchasing the securities for investment and not with an intention to distribute to the public. Any resale by the purchaser must be pursuant to an exempt transaction and may be accomplished in accordance with Rule 144A. Section 4(a)(2) securities normally are resold to other institutional investors through or with the assistance of the issuer or dealers that make a market in the Section 4(a)(2) securities, thus providing liquidity. The Manager and the applicable sub-advisor will carefully monitor a Fund's investments in Section 4(a)(2) securities offered and sold under Rule 144A, focusing on such important factors, among others, as valuation, liquidity, and availability of information.

Restricted securities outstanding during the year ended March 31, 2026 are disclosed in the Notes to the Schedules of Investments.

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

### *Other Investment Company Securities and Other Exchange-Traded Products*

The Funds may invest in shares of other investment companies, including government money market funds and ETFs. The Funds may invest in securities of an investment company advised by the Manager, with respect to which the Manager also receives a management fee. Investments in the securities of other investment companies may involve duplication of advisory fees and certain other expenses. By investing in another investment company, the Funds become a shareholder of that investment company. As a result, the Funds' shareholders indirectly will bear the Funds' proportionate share of the fees and expenses paid by shareholders of the other investment company, in addition to the fees and expenses the Funds' shareholders directly bear in connection with the Funds' own operations. These other fees and expenses are reflected as Acquired Fund Fees and Expenses and are included in the Fees and Expenses Table for the Funds in their Prospectus, if applicable. Investments in other investment companies may involve the payment of substantial premiums above the value of such issuer's portfolio securities.

The Funds can invest free cash balances in registered open-end investment companies regulated as government money market funds under the Act, to provide liquidity or for defensive purposes. The Funds could invest in government money market funds rather than purchasing individual short-term investments. If the Funds invest in government money market funds, shareholders will bear their proportionate share of the expenses, including for example, advisory and administrative fees, of the government money market funds in which the Funds invest, including advisory fees charged by the Manager to any applicable government money market funds advised by the Manager.

The Funds may invest in ETFs. ETFs trade like a common stock, and passively-managed ETFs usually represent a fixed portfolio of securities designed to track the performance and dividend yield of a particular domestic or foreign market index. ETF shares typically are purchased and redeemed through in-kind purchases and redemptions, and trade on a stock exchange at market prices, which may differ from an ETF's NAV. Typically, a Fund would purchase passive ETF shares to obtain exposure to all or a portion of the stock or bond market. As a shareholder of an ETF, a Fund would be subject to its ratable share of the ETF's expenses, including its advisory and administration expenses. An investment in an ETF generally presents the same primary risks as an investment in a conventional mutual fund (i.e., one that is not exchange-traded) that has the same investment objective, strategies and policies but also presents some additional risks due to being exchange-traded. The price of an ETF can fluctuate within a wide range.

### *Real Estate Investment Trusts ("REITs")*

REITs are pooled investment vehicles that own, and often operate, income producing real estate (known as "equity REITs") or invest in mortgages secured by loans on such real estate (known as "mortgage REITs") or both (known as "hybrid REITs"). REITs are susceptible to the risks associated with direct ownership of real estate, such as declines in property values, increase in property taxes, operating expenses, rising interest rates or overbuilding, zoning changes, and losses from casualty or condemnation. REITs typically are subject to management fees and other expenses that are separate from those of a Fund.

## **5. Principal Risks**

Investing in the Funds may involve certain risks including, but not limited to, those described below.

### *Convertible Securities Risk*

The conversion value of a convertible security, including a convertible preferred security, is the market value that would be received if the convertible were converted to its underlying common stock. The value of a convertible security typically increases or decreases with the price of the underlying common stock. When conversion value is substantially below investment value, the convertible's price tends to be influenced more by its yield, so changes in the price of the underlying common stock may not have as much of an impact. Conversely, the

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

convertible's price tends to be influenced more by the price of the underlying common stock when conversion value is comparable to or exceeds investment value. In general, a convertible security is subject to the risks of stocks, and its price may be as volatile as that of the underlying stock when the underlying stock's price is high relative to the conversion price. A convertible security also is subject to the risks of debt securities, and is particularly sensitive to changes in interest rates, when the underlying stock's price is low relative to the conversion price. The investment value of a convertible is based on its yield and tends to decline as interest rates increase. The general market risks of debt securities that are common to convertible securities include, but are not limited to, interest rate risk and credit risk, and there is a risk that the credit standing of the issuer may have an effect on the convertible security's investment value. Convertible securities generally have less potential for gain or loss than common stocks. Securities that are convertible other than at the option of the holder generally do not limit the potential for loss to the same extent as securities that are convertible at the option of the holder. Many convertible securities have credit ratings that are below investment grade (commonly known as "junk bonds") and are subject to the same risks as an investment in lower-rated debt securities. Lower-rated debt securities may fluctuate more widely in price and yield than investment grade debt securities and may fall in price during times when the economy is weak or is expected to become weak. The credit rating of a company's convertible securities is generally lower than that of its non-convertible debt securities. Convertible securities are normally considered "junior" securities – that is, the company usually must pay interest on its non-convertible debt securities before it can make payments on its convertible securities. If the issuer stops paying interest or principal, convertible securities may become worthless and a Fund could lose its entire investment. In addition, to the extent a Fund invests in convertible securities issued by small- or mid-capitalization companies, it will be subject to the risks of investing in such companies. The stocks of small- and mid-capitalization companies may fluctuate more widely in price than the market as a whole and there may also be less trading in small- or mid-capitalization stocks.

### *Covenant-Lite Obligations Risk*

Certain investments, such as loans in which a Fund may invest directly or have exposure to through its investments in structured securities, may be "covenant-lite." Covenant-lite obligations contain fewer maintenance covenants than other obligations, or no maintenance covenants at all, and may not include terms which allow the lender to monitor the performance of the borrower and declare a default if certain criteria are breached, which would allow the lender to restructure the loan or take other action intended to help mitigate losses. This may expose a Fund to greater credit risk associated with the borrower and reduce a Fund's ability to restructure a problematic loan and mitigate potential loss. As a result, a Fund's exposure to losses on such investments may be increased, especially during a downturn in the credit cycle, and a Fund may experience relatively greater difficulty or delays in enforcing its rights on its holdings of covenant-lite obligations than its holdings of loans or securities with financial maintenance covenants.

### *Credit Risk*

The Funds are subject to the risk that the issuer or guarantor of an obligation, or the counterparty to a transaction, including a derivatives contract or a loan, may fail, or become less able, to make timely payments of interest or principal or otherwise honor its obligations or default completely. The strategies utilized by the sub-advisor require accurate and detailed credit analysis of issuers and there can be no assurance that its analysis will be accurate or complete. The Funds may be subject to substantial losses in the event of credit deterioration or bankruptcy of one or more issuers in its portfolio. Financial strength and solvency of an issuer are the primary factors influencing credit risk. In addition, inadequacy of collateral or credit enhancement for a debt instrument may affect its credit risk. Credit risk may change over the life of an instrument and debt obligations which are rated by rating agencies may be subject to downgrade. The credit ratings of debt instruments and investments represent the rating agencies' opinions regarding their credit quality and are not a guarantee of future credit performance of such securities. Rating agencies attempt to evaluate the safety of the timely payment of principal and interest (or dividends) and do not evaluate the risks of fluctuations in market value. The ratings assigned to securities by rating agencies do not purport to fully reflect the true risks of an investment. Further, in recent years many highly-rated structured securities have been subject to substantial losses as the economic assumptions on

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

which their ratings were based proved to be materially inaccurate. A decline in the credit rating of an individual security held by a Fund may have an adverse impact on its price and may make it difficult for a Fund to sell it. Ratings represent a rating agency's opinion regarding the quality of the security and are not a guarantee of quality. Rating agencies might not always change their credit rating on an issuer or security in a timely manner to reflect events that could affect the issuer's ability to make timely payments on its obligations. Credit risk is typically greater for securities with ratings that are below investment grade (commonly referred to as "junk bonds"). Since a Fund can invest significantly in high yield investments that are considered speculative in nature, this risk maybe substantial. Changes in the actual or perceived creditworthiness of an issuer, or a downgrade or default affecting any of a Fund's securities, could affect a Fund's performance.

### *Currency Risk*

The Funds may have exposure to foreign currencies by making direct investments in non-U.S. currencies or in securities denominated in non-U.S. currencies, or by purchasing or selling forward currency exchange contracts in non-U.S. currencies. Foreign currencies may decline in value relative to the U.S. dollar, or, in the case of hedging positions, the U.S. dollar may decline in value relative to the currency being hedged, and thereby affect a Fund's investments in foreign (non-U.S.) currencies or in securities that trade in, and receive revenues in, or in derivatives that provide exposure to, foreign (non-U.S.) currencies. Currency exchange rates may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates, intervention (or the failure to intervene) by U.S. or foreign governments, central banks or supranational entities such as the International Monetary Fund, or by the imposition of currency controls or other political developments in the United States or abroad. As a result, the Funds' investments in foreign currency denominated securities may reduce the returns of the Funds. Currency futures, forwards, options or swaps may not always work as intended, and in specific cases, the Funds may be worse off than if it had not used such instrument(s). There may not always be suitable hedging instruments available. Even where suitable hedging instruments are available, the Funds may choose to not hedge their currency risks.

### *Cybersecurity and Operational Risk*

Operational risks arising from, among other problems, human errors, systems and technology disruptions or failures, or cybersecurity incidents may negatively impact the Funds, their service providers and third-party fund distribution platforms, including the ability of shareholders to transact in the Funds' shares, and result in financial losses. Cybersecurity incidents may allow an unauthorized party to gain access to Funds' assets, shareholder data, or proprietary information, or cause the Funds or their service providers, as well as securities trading venues and their service providers, to suffer data corruption or lose operational functionality. Cybersecurity incidents can result from deliberate attacks or unintentional events. It is not possible for the Funds or their service providers to identify all of the operational risks that may affect the Funds or to develop processes and controls to completely eliminate or mitigate their occurrence or effects. The Funds cannot control the cybersecurity and operational plans and systems of their service providers, their counterparties or the issuers of securities in which the Funds invest. The issuers of the Funds' investments are likely to be dependent on computers for their operations and require ready access to their data and the internet to conduct their business. Thus, cybersecurity incidents could also affect issuers of the Funds' investments, leading to significant loss of value.

### *Equity Investments Risk*

Equity securities are subject to market risk. The Funds' investments in equity securities may include common stocks, preferred stocks, securities convertible into or exchangeable for common stocks, REITs, depositary receipts, and U.S. dollar-denominated foreign stocks traded on U.S. exchanges. Such investments may expose the Funds to additional risk. The value of a company's common stock may fall as a result of factors affecting the company, companies in the same industry or sector, or the financial markets overall. Common stock generally is subordinate to preferred stock upon the liquidation or bankruptcy of the issuing company. Preferred stocks and convertible securities are sensitive to movements in interest rates. Preferred stocks may be less liquid than

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

common stocks and, unlike common stocks, participation in the growth of an issuer may be limited. Distributions on preferred stocks generally are payable at the discretion of an issuer and after required payments to bond holders. Convertible securities are subject to the risk that the credit standing of the issuer may have an effect on the convertible securities' investment value. Investments in REITs are subject to the risks associated with investing in the real estate industry such as adverse developments affecting the real estate industry and real property values. Depositary receipts and U.S. dollar-denominated foreign stocks traded on U.S. exchanges are subject to certain of the risks associated with investing directly in foreign securities, including, but not limited to, currency exchange rate fluctuations, political and financial instability in the home country of a particular depositary receipt, less liquidity and more volatility, less government regulation and supervision and delays in transaction settlement.

### *Floating and Variable Rate Securities Risk*

The coupons on certain fixed income securities in which the Funds may invest are not fixed and may fluctuate based upon changes in market rates. The coupon on a floating and variable rate security is generally based on an interest rate such as a money-market index, LIBOR or a Treasury bill rate. Such securities are subject to interest rate risk and may fluctuate in value in response to interest rate changes if there is a delay between changes in market interest rates and the interest reset date for the obligation, or for other reasons. As short-term interest rates decline, the coupons on floating rate securities typically decrease. Alternatively, during periods of rising interest rates, changes in the coupons of floating rate securities may lag behind changes in market rates or may have limits on the maximum increases in the coupon rates. The value of floating and variable rate securities may decline if their coupons do not rise as much, or as quickly, as interest rates in general. Floating and variable rate obligations are less effective than fixed rate obligations at locking in a particular yield and are subject to credit risk. Certain types of floating rate instruments may also be subject to greater liquidity risk than other debt securities.

### *Futures Contracts Risk*

There may at times be an imperfect correlation between the movement in the prices of futures contracts and the value of their underlying instruments or index. Futures contracts may experience dramatic price changes (losses) and imperfect correlations between the price of the contract and the underlying security, index or currency, which may increase the volatility of a Fund. Futures contracts may involve a small investment of cash (the amount of initial and variation margin) relative to the magnitude of the risk assumed (the potential increase or decrease in the price of the futures contract). There can be no assurance that, at all times, a liquid market will exist for offsetting a futures contract that a Fund has previously bought or sold and this may result in the inability to close a futures contract when desired. When a Fund purchases or sells a futures contract, it is subject to daily variation margin calls that could be substantial. If a Fund has insufficient cash to meet daily variation margin requirements, it might need to sell securities at a time when such sales are disadvantageous. Treasury futures contracts expose a Fund to price fluctuations resulting from changes in interest rates and to potential losses if interest rates do not move as expected.

### *High-Yield Securities Risk*

Exposure to high-yield securities (commonly referred to as "junk bonds") generally involves significantly greater risks of loss of your money than an investment in investment-grade securities. Compared with issuers of investment grade securities, issuers of high-yield securities are more likely to encounter financial difficulties and to be materially affected by these difficulties. High-yield debt securities may fluctuate more widely in price and yield and may fall in price when the economy is weak or expected to become weak. These securities also may be difficult to sell at the time and price the Fund desires. High-yield securities are considered to be speculative with respect to an issuer's ability to pay interest and repay principal and carry a greater risk that issuers of lower-rated securities will default on the timely payment of principal or interest. Rising interest rates may compound these difficulties and reduce an issuer's ability to repay principal and interest obligations. Issuers of lower-rated securities also have a greater risk of default or bankruptcy. Issuers of securities that are in default or have

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

defaulted may fail to resume principal or interest payments, in which case the Fund may lose its entire investment. Below-investment-grade securities may experience greater price volatility and less liquidity than investment-grade securities.

Lower-rated securities are subject to certain risks that may not be present with investments in higher-grade securities. Investors should consider carefully their ability to assume the risks associated with lower-rated securities before investing in the Fund. The lower rating of certain high-yielding fixed-income securities reflects a greater possibility that the financial condition of the issuer or adverse changes in general economic conditions may impair the ability of the issuer to pay income and principal. Changes by credit rating agencies in their ratings of a fixed-income security also may affect the value of these investments. However, allocating investments among securities of different issuers could reduce the risks of owning any such securities separately. The prices of these high-yield securities tend to be less sensitive to interest rate changes than investment-grade investments, but more sensitive to adverse economic changes or individual corporate developments. During economic downturns or periods of rising interest rates, highly leveraged issuers may experience financial stress that adversely affects their ability to service principal and interest payment obligations, to meet projected business goals or to obtain additional financing, and the markets for their securities may be more volatile. If an issuer defaults, the Fund may incur additional expenses to seek recovery. Additionally, accruals of interest income for the Fund may have to be adjusted in the event of default. In the event of an issuer's default, the Fund may write off prior income accruals for that issuer, resulting in a reduction in the Fund's current distribution payment. Frequently, the higher yields of high-yielding securities may not reflect the value of the income stream that holders of such securities may expect, but rather the risk that such securities may lose a substantial portion of their value as a result of their issuer's financial restructuring or default.

### *Interest Rate Risk*

Generally, the value of investments with interest rate risk, such as fixed-income securities or derivatives, will move in the opposite direction to movements in interest rates. Factors including central bank monetary policy, rising inflation rates, and changes in general economic conditions may cause interest rates to rise, which could cause the value of the Fund's investments to decline. Interest rates may rise, perhaps significantly and/or rapidly, potentially resulting in substantial losses to the Fund. Interest rate changes may have a more pronounced effect on the market value of fixed-rate instruments than on floating-rate instruments. The value of floating rate and variable securities may decline if their interest rates do not rise as quickly, or as much, as general interest rates. The prices of fixed-income securities or derivatives are also affected by their durations. Fixed-income securities or derivatives with longer durations generally have greater sensitivity to changes in interest rates. Rising interest rates may cause the value of the Fund's investments with longer durations and terms to maturity to decline, which may adversely affect the value of the Fund. For example, if a bond has a duration of eight years, a 1% increase in interest rates could be expected to result in an 8% decrease in the value of the bond. An increase in interest rates can impact markets broadly as well. To the extent the Fund holds an investment with a negative interest rate to maturity, the Fund may generate a negative return on that investment.

### *Liquidity Risk*

The Funds are susceptible to the risk that certain investments held by the Funds may have limited marketability, be subject to restrictions on sale, be difficult or impossible to purchase or sell at favorable times or prices or become less liquid in response to market developments or adverse credit events that may affect issuers or guarantors of a security. An inability to sell a portfolio position can adversely affect the Funds' value or prevent the Funds from being able to take advantage of other investment opportunities. Market prices for such instruments may be volatile. During periods of substantial market volatility, an investment or even an entire market segment may become illiquid, sometimes abruptly, which can adversely affect the Funds' ability to limit losses. The Funds could lose money if it is unable to dispose of an investment at a time that is most beneficial to the Funds. The Funds may be required to dispose of investments at unfavorable times or prices to satisfy obligations, which may result in losses or may be costly to the Funds. For example, liquidity risk may be magnified in rising interest rate

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

environments in the event of higher-than-normal redemption rates. Unexpected redemptions may force the Funds to sell certain investments at unfavorable prices to meet redemption requests or other cash needs. Judgment plays a greater role in pricing illiquid investments than in investments with more active markets.

### *Loan Interests Risk*

In making investments in bank loans or senior loans, the Funds will depend primarily on the creditworthiness of the borrower for payment of principal and interest, and will also rely on the financial institution to make principal and interest payments to the Funds once it receives payment on the underlying loan or to pursue appropriate remedies against a borrower in the event that the borrower defaults which may be exposed to the credit risk of both the financial institution that made the loan and the underlying borrower. Unlike publicly traded common stocks, which trade on national exchanges, there is no central place or exchange for loans, including bank loans and senior loans, to trade. There is a risk that the value of any collateral securing a loan in which a Fund has an interest may decline and that the collateral may not be sufficient to cover the amount owed on the loan. In the event that the borrower defaults, a Fund's access to the collateral may be limited or delayed by bankruptcy or other insolvency laws. Loans trade in an over-the-counter market, and confirmation and settlement, which are effected through standardized procedures and documentation, may take significantly longer than seven days to complete. Extended trade settlement periods may, in unusual market conditions with a high volume of shareholder redemptions, present a risk to shareholders with respect to a Fund's ability to pay redemption proceeds within the allowable time periods. The secondary market for loans also may be subject to irregular trading activity and wide bid/ask spreads. The lack of an active trading market for certain loans may impair the ability of a Fund to sell its loan interests at a time when it may otherwise be desirable to do so or may require a Fund to sell them at prices that are less than what a Fund regards as their fair market value and may make it difficult to value such loans. Accordingly, loan interests may at times be illiquid. Interests in loans made to finance highly leveraged companies or transactions, such as corporate acquisitions, may be especially vulnerable to adverse changes in economic or market conditions.

A Fund may acquire a loan interest by direct investment as a lender, by obtaining an assignment of all or a portion of the interests in a particular loan that are held by an original lender or a prior assignee, or by participation in a loan interest that is held by another party. As an assignee, a Fund normally will succeed to all rights and obligations of its assignor with respect to the portion of the loan that is being assigned. However, the rights and obligations acquired by the purchaser of a loan assignment may differ from, and be more limited than, those held by the original lenders or the assignor. When a Fund's loan interest is a participation, a Fund is subject to the risk that the party selling the participation interest will not remit a Fund's pro rata share of loan payments to a Fund, and a Fund may have less control over the exercise of remedies against the borrower and/or the financial institution that made the loan than the party selling the participation interest.

### *Market Risk*

The Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect the Fund's performance. Equity securities generally have greater price volatility than fixed-income securities, although under certain market conditions fixed-income securities may have comparable or greater price volatility. During a general downturn in the securities markets, multiple assets may decline in value simultaneously. In some cases, traditional market participants have been less willing to make a market in some types of debt instruments, which has affected the liquidity of those instruments. During times of market turmoil, investors tend to look to the safety of securities issued or backed by the U.S. Treasury, causing the prices of these securities to rise and the yields to decline. Reduced liquidity in fixed-income and credit markets may negatively affect many issuers worldwide. Prices in many financial markets have increased significantly over the last decade, but there have also been periods of adverse market and financial developments and cyclical change during that timeframe, which have resulted in unusually high levels of volatility in domestic and foreign financial markets that has caused losses for investors and may occur again in the future, particularly if markets enter a period of uncertainty or economic weakness. Periods of

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

unusually high volatility in the financial markets and restrictive credit conditions, sometimes limited to a particular sector or geographic region, continue to recur. The value of a security may decline due to adverse issuer-specific conditions or general market conditions unrelated to a particular issuer, such as real or perceived adverse geopolitical, regulatory, market, economic or other developments that may cause broad changes in market value, changes in the general outlook for corporate earnings, changes in interest, currency or inflation rates, lack of liquidity in the markets, public perceptions concerning these developments or adverse market sentiment generally. The value of a security may also decline due to factors that affect a particular industry or industries, such as tariffs, labor shortages or increased production costs and competitive conditions within an industry. The imposition by the U.S. of tariffs on goods imported from foreign countries and reciprocal tariffs levied on U.S. goods by those countries also may lead to volatility and instability in domestic and foreign markets. Changes in the financial condition of a single issuer or market segment also can impact the market as a whole.

Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, pandemics, public health crises, natural disasters, cybersecurity incidents, and related events have led, and in the future may continue to lead, to instability in world economies and markets generally and reduced liquidity, which may adversely affect the value of your investment. Such market disruptions have caused, and may continue to cause, broad changes in market value, negative public perceptions concerning these developments, a reduction in the willingness and ability of some lenders to extend credit, difficulties for some borrowers in obtaining financing on attractive terms, if at all, and adverse investor sentiment or publicity. Changes in value may be temporary or may last for extended periods. Adverse market events may also lead to increased shareholder redemptions, which could cause the Fund to sell investments at an inopportune time to meet redemption requests by shareholders and may increase the Fund's portfolio turnover, which could increase the costs that the Fund incurs and lower the Fund's performance. Even when securities markets perform well, there is no assurance that the investments held by a Fund will increase in value along with the broader market.

Policy changes by the U.S. government and/or Federal Reserve and economic and political changes within the U.S. and abroad, such as inflation, changes in interest rates, recessions, changes in the U.S. presidential administration and Congress, the U.S. government's inability at times to agree on a long-term budget and deficit reduction plan, the threat or occurrence of a federal government shutdown and threats or the occurrence of a failure to increase the federal government's debt limit, which could result in a default on the government's obligations, may affect investor and consumer confidence and may adversely impact financial markets and the broader economy, perhaps suddenly and to a significant degree. The severity or duration of adverse economic conditions may also be affected by policy changes made by governments or quasi-governmental organizations. Global economies and financial markets are becoming increasingly interconnected, which increases the possibility of many markets being affected by events in a single country or events affecting a single or small number of issuers.

Markets and market participants are increasingly reliant upon both publicly available and proprietary information data systems. Data imprecision, software or other technology malfunctions, programming inaccuracies, unauthorized use or access, and similar circumstances may impair the performance of these systems and may have an adverse impact upon a single issuer, a group of issuers, or the market at large. In certain cases, an exchange or market may close or issue trading halts on either specific securities or even the entire market, which may result in the Fund being, among other things, unable to buy or sell certain securities or financial instruments or accurately price its investments. These fluctuations in securities prices could be a sustained trend or a drastic movement. The financial markets generally move in cycles, with periods of rising prices followed by periods of declining prices. The value of your investment may reflect these fluctuations.

### *Other Investment Companies Risk*

To the extent that a Fund invests in shares of other registered investment companies, a Fund will indirectly bear the fees and expenses, including, for example, advisory and administrative fees, charged by those investment companies in addition to a Fund's direct fees and expenses. If a Fund invests in other investment companies, a

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

Fund may receive distributions of taxable gains from portfolio transactions by that investment company and may recognize taxable gains from transactions in shares of that investment company, which could be taxable to a Fund's shareholders when distributed to them. A Fund must rely on the investment company in which it invests to achieve its investment objective. If the investment company fails to achieve its investment objective, the value of a Fund's investment may decline, adversely affecting a Fund's performance. To the extent a Fund invests in other investment companies that invest in equity securities, fixed-income securities and/or foreign securities, or that track an index, a Fund is subject to the risks associated with the underlying investments held by the investment company or the index fluctuations to which the investment company is subject.

### *Pay-In-Kind Securities Risk*

Pay-in-kind securities are debt securities that do not make regular cash interest payments. Pay-in-kind securities pay interest through the issuance of additional securities. Because these securities do not pay current cash income, their prices can be volatile when interest rates fluctuate. If an issuer of pay-in-kind securities defaults, the Fund may lose its entire investment. Federal income tax law requires a holder of pay-in-kind securities to include in gross income each taxable year the portion of the non-cash income on those securities (i.e., the additional securities issued as interest thereon) accrued during that year. In order to continue to qualify for treatment as a "regulated investment company" ("RIC") under the Internal Revenue Code, and avoid federal excise tax, a Fund may be required to distribute a portion of such non-cash income and may be required to dispose of other portfolio securities in order to generate cash to meet these distribution requirements, potentially during periods of adverse market prices.

### *Prepayment and Extension Risk*

When interest rates fall, borrowers will generally repay the loans that underlie certain debt securities, especially mortgage-related and other types of ABS, more quickly than expected, causing the issuer of the security to repay the principal prior to the security's expected maturity date. A Fund may need to reinvest the proceeds at a lower interest rate, reducing its income. Securities subject to prepayment risk generally offer less potential for gains when prevailing interest rates fall. If a Fund buys those securities at a premium, accelerated prepayments on those securities could cause a Fund to lose a portion of its principal investment. The impact of prepayments on the price of a security may be difficult to predict and may increase the security's price volatility. Variable and floating rate securities may be less sensitive to prepayment risk. Extension risk is the risk that a decrease in prepayments may, as a result of higher interest rates or other factors, result in the extension of a security's effective maturity, heighten interest rate risk and increase the potential for a decline in its price.

### *Recent Market Events Risk*

Both U.S. and international markets have experienced significant volatility in recent months and years. As a result of such volatility, investment returns may fluctuate significantly. Moreover, the risks discussed herein associated with an investment in a Fund may be increased.

Although interest rates were unusually low in the U.S. and abroad for a period of time, in 2022, the U.S. Federal Reserve (the "Federal Reserve") and certain foreign central banks began to raise interest rates as part of their efforts to address rising inflation. The Federal Reserve and certain foreign central banks subsequently started to lower interest rates in September 2024, though economic or other factors, such as inflation, could lead to the Federal Reserve stopping or reversing these changes. It is difficult to accurately predict the pace at which interest rates might change, the timing, frequency or magnitude of any such changes in interest rates, or when such changes might stop or again reverse course. Additionally, various economic and political factors could cause the Federal Reserve or foreign central banks to change their approach in the future as such actions may result in an economic slowdown both in the U.S. and abroad. Unexpected changes in interest rates could lead to significant market volatility or reduce liquidity in certain sectors of the market. It is difficult to predict the impact on various markets of significant interest rate changes or other significant policy changes. Deteriorating economic

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

fundamentals may increase the risk of default or insolvency of particular issuers, negatively impact market value, increase market volatility, cause credit spreads to widen, reduce bank balance sheets and cause unexpected changes in interest rates. Any of these could cause an increase in market volatility, reduce liquidity across various sectors or markets or decrease confidence in the markets. Also, regulators have expressed concern that changes in interest rates may cause investors to sell fixed income securities faster than the market can absorb them, contributing to price volatility. Historical patterns of correlation among asset classes may break down in unanticipated ways during times of high volatility, disrupting investment programs and potentially causing losses.

Tensions, war or open conflict between nations, such as between Russia and Ukraine, in the Middle East or in eastern Asia could affect the economies of many nations, including the United States. The duration of ongoing hostilities in the Middle East and between Russia and Ukraine, and any sanctions and related events cannot be predicted. Those events present material uncertainty and risk with respect to markets globally and the performance of the Fund and its investments or operations could be negatively impacted whether or not the Fund invests in securities of issuers located in or with significant exposure to the countries or regions directly affected.

Regulators in the U.S. have adopted a number of changes to regulations involving the markets and issuers, some of which apply to the Fund. The full effect of various newly adopted regulations is not currently known. Due to the scope of regulations being adopted, certain of these changes could limit the Fund's ability to pursue its investment strategies or make certain investments, may make it more costly for the Fund to operate, or adversely impact performance. Additionally, it is possible that recently adopted regulations could be further revised or rescinded, which creates material uncertainty regarding their impact to the Fund.

Economists and others have expressed increasing concern about the potential effects of global climate change on property and security values. Impacts from climate change may include significant risks to global financial assets and economic growth. A rise in sea levels, an increase in powerful storms and/or a climate-driven increase in sea levels or flooding could cause coastal properties to lose value or become unmarketable altogether. Certain issuers, industries and regions may be adversely affected by the impacts of climate change in ways that cannot be foreseen, including on the demand for and the development of goods and services and related production costs, and the impacts of legislation, regulation and international accords related to climate change, as well as any indirect consequences of regulation or business trends driven by climate change. Regulatory changes and divestment movements tied to concerns about climate change could adversely affect the value of certain land and the viability of industries whose activities or products are seen as accelerating climate change. Losses related to climate change could adversely affect, among others, corporate issuers and mortgage lenders, the value of mortgage-backed securities, the bonds of municipalities that depend on tax or other revenues and tourist dollars generated by affected properties, and insurers of the property and/or of corporate, municipal or mortgage-backed securities.

### *Redemption Risk*

A Fund may experience periods of high levels of redemptions that could cause a Fund to sell assets at inopportune times or at a loss or depressed value. The sale of assets to meet redemption requests may create net capital gains, which could cause a Fund to have to distribute substantial capital gains. Redemption risk is heightened during periods of declining or illiquid markets. During periods of heavy redemptions, a Fund may borrow funds through the interfund credit facility or from a bank line of credit, which may increase costs. A rise in interest rates or other market developments may cause investors to move out of fixed income securities on a large scale. Heavy redemptions could hurt a Fund's performance.

### *Restricted Securities Risk*

Securities not registered in the U.S. under the Securities Act of 1933, as amended (the "Securities Act"), or in non-U.S. markets pursuant to similar regulations, including "Section 4(a)(2)" securities and "Rule 144A" securities, are restricted as to their resale. Such securities may not be listed on an exchange and may have no

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

---

active trading market. The prices of these securities may be more difficult to determine than publicly traded securities and these securities may involve heightened risk as compared to investments in securities of publicly traded companies. They may be more difficult to purchase or sell at an advantageous time or price because such securities may not be readily marketable in broad public markets, or may have to be held for a certain time period before they can be resold. A Fund may not be able to sell a restricted security when a sub-advisor considers it desirable to do so and/or may have to sell the security at a lower price than a Fund believes is its fair market value. A restricted security that was liquid at the time of purchase may subsequently become illiquid. In addition, transaction costs may be higher for restricted securities and a Fund may receive only limited information regarding the issuer of a restricted security. A Fund may have to bear the expense of registering restricted securities for resale and the risk of substantial delays in effecting the registration. If, during such a delay, adverse market conditions were to develop, a Fund might obtain a less favorable price than prevailed at the time it decided to seek registration of the security.

### *Unrated Securities Risk*

Because the Fund may purchase securities that are not rated by any rating organization, the Sub-Advisor, after assessing their credit quality, may internally assign ratings to certain of those securities in categories of those similar to those of rating organizations. Investing in unrated securities involves the risk that the Sub-Advisor may not accurately evaluate the security's comparative credit rating. Analysis of the creditworthiness of issuers of unrated securities may be more complex than for issuers of higher-quality debt obligations. To the extent that the Fund invests in unrated securities, the Fund's success in achieving its investment objectives may depend more heavily on the Sub-Advisor's credit analysis than if the Fund invested exclusively in rated securities. Some unrated securities may not have an active trading market or may be difficult to value, which means the Fund might have difficulty selling them promptly at an acceptable price. Unrated securities may also be subject to greater liquidity risk and price volatility.

### *Valuation Risk*

This is the risk that a Fund has valued a security at a price different from the price at which it can be sold. This risk may be especially pronounced for investments, such as derivatives, which may be illiquid or which may become illiquid and for securities that trade in relatively thin markets and/or markets that experience extreme volatility. A Fund's ability to value its investments in an accurate and timely manner may be impacted by technological issues and/or errors by third party service providers, such as pricing services or accounting agents. If market conditions make it difficult to value certain investments, SEC rules and applicable accounting protocols may require a Fund may value these investments using more subjective methods, such as fair-value methodologies. Investors who purchase or redeem Fund shares on days when a Fund is holding fair-valued securities may receive fewer or more shares, or lower or higher redemption proceeds, than they would have received if a Fund had not fair-valued the securities or had used a different valuation methodology. The value of foreign securities, certain fixed-income securities and currencies, as applicable, may be materially affected by events after the close of the markets on which they are traded, but before a Fund determines its NAV.

### *Variable and Floating Rate Securities Risk*

The coupons on certain fixed-income securities in which a Fund may invest are not fixed and may fluctuate based upon changes in market rates. The coupon on a floating rate security is generally based on an interest rate such as a money-market index, SOFR, LIBOR or a Treasury bill rate. Such securities are subject to interest rate risk and may fluctuate in value in response to interest rate changes if there is a delay between changes in market interest rates and the interest reset date for the obligation, or for other reasons. As short-term interest rates decline, the coupons on variable and floating rate securities typically decrease. Alternatively, during periods of rising interest rates, changes in the coupons of variable and floating rate securities may lag behind changes in market rates or may have limits on the maximum increases in the coupon rates. The value of variable and floating rate securities may decline if their coupons do not rise as much, or as quickly, as interest rates in general.

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

Conversely, variable and floating rate securities will not generally increase in value if interest rates decline. Variable and floating rate securities are less effective at locking in a particular yield and are subject to credit risk. Certain types of floating rate instruments may also be subject to greater liquidity risk than other debt securities.

### 6. Federal Income and Excise Taxes

It is the policy of each Fund to qualify as a RIC, by complying with all applicable provisions of Subchapter M of the Internal Revenue Code, as amended, and to make distributions of taxable income sufficient to relieve it from substantially all federal income and excise taxes. For federal income tax purposes, each Fund is treated as a single entity for the purpose of determining such qualification.

Although both Funds have an accounting year end of March 31st, DoubleLine Floating Rate has a tax year of August 31st and DoubleLine Select Income has a tax year end of March 31st.

The Funds do not have any unrecorded tax liabilities in the accompanying financial statements. Each of the tax years for DoubleLine Floating Rate in the four year period ending August 31, 2025 and each of the tax years for DoubleLine Select Income in the four year period ended March 31, 2026 remain subject to examination by the Internal Revenue Service. If applicable, the Funds recognize interest accrued related to unrecognized tax benefits in interest expense and penalties in "Other expenses" on the Statements of Operations.

The Funds may be subject to taxes imposed by countries in which it invests. Such taxes are generally based on returns of income earned or gains realized or repatriated. Taxes are accrued and applied to net investment income, net realized capital gains and net unrealized appreciation (depreciation), as applicable, as the income is earned or capital gains are recorded.

Dividends are categorized in accordance with income tax regulations which may treat certain transactions differently than U.S. GAAP. Accordingly, the character of distributions and composition of net assets for tax purposes may differ from those reflected in the accompanying financial statements.

The tax character of distributions paid were as follows:

	DoubleLine Floating Rate Fund		DoubleLine Select Income Fund	
	Year Ended August 31, 2025	Year Ended March 31, 2026	Year Ended March 31, 2025	
<b>Distributions paid from:</b>				
<b>Ordinary income*</b>				
R5 Class	\$ 1,727,359	\$ -	\$ -	
Y Class	4,293,807	15,187,823	15,412,073	
Investor Class	948,945	302,393	275,504	
A Class	974,553	-	-	
C Class	601,608	-	-	
R6 Class	-	39	-	
<b>Total distributions paid</b>	<u>\$ 8,546,272</u>	<u>\$ 15,490,255</u>	<u>\$ 15,687,577</u>	

\* For tax purposes, short-term capital gains are considered ordinary income distributions.

As of March 31, 2026, the components of distributable earnings (deficits) on a tax basis were as follows:

Fund	Tax Cost	Unrealized Appreciation	Unrealized (Depreciation)	Net Unrealized Appreciation (Depreciation)
DoubleLine Floating Rate Fund	\$ 137,898,556	\$ 260,336	\$ (5,438,677)	\$ (5,178,341)
DoubleLine Select Income Fund	356,675,130	3,689,423	(8,480,531)	(4,791,108)

# American Beacon Funds<sup>SM</sup>

## Notes to Financial Statements

March 31, 2026

<u>Fund</u>	<u>Net Unrealized Appreciation (Depreciation)</u>	<u>Undistributed Ordinary Income</u>	<u>Undistributed Long-Term Capital Gains</u>	<u>Accumulated Capital and Other (Losses)</u>	<u>Other Temporary Differences</u>	<u>Distributable Earnings</u>
DoubleLine Floating Rate Fund* . . . . .	\$ (9,499,408)	\$ 687,766	\$ -	\$ (281,876,640)	\$ (2)	\$(290,688,284)
DoubleLine Select Income Fund . . . . .	(4,791,108)	1,652,571	-	(38,426,309)	-	(41,564,846)

\* Distributable earnings are reported as of August 31, 2025.

Financial reporting records are adjusted for permanent book/tax differences to reflect tax character. Financial records are not adjusted for temporary differences. The temporary differences between financial reporting and tax-basis reporting of unrealized appreciation (depreciation) are attributable primarily to unused capital loss carryforwards, premium amortization, the realization for tax purposes of unrealized gains from passive foreign investment companies, and market discount tax adjustments.

Due to inherent differences in the recognition of income, expenses, and realized gains (losses) under U.S. GAAP and federal income tax regulations, permanent differences between book and tax reporting have been identified and appropriately reclassified on the Statements of Assets and Liabilities. The Funds had no permanent differences as of March 31, 2026.

For federal income tax purposes, the Funds measure their capital loss carryforwards annually at their fiscal year end. Capital loss carryforwards retain their character as short-term and/or long-term and may be carried forward and applied against future realized capital gains with no expiration date.

During the year ended August 31, 2025, the DoubleLine Floating Rate Fund had \$84,801,644 in Short-Term and \$197,074,996 in Long-Term capital loss carryforwards. During the year ended March 31, 2026, the DoubleLine Select Income Fund had \$1,842,095 in Short-Term and \$36,584,214 in Long-Term capital loss carryforwards.

The ability to utilize capital loss carryforwards in the future could be limited under the Internal Revenue Code and related regulations based on the results of future transactions.

## 7. Investment Transactions

The aggregate cost of purchases and proceeds from sales and maturities of investments, other than short-term obligations, for the year ended March 31, 2026 were as follows:

<u>Fund</u>	<u>Purchases (non-U.S. Government Securities)</u>	<u>Purchases of U.S. Government Securities</u>	<u>Sales (non-U.S. Government Securities)</u>	<u>Sales of U.S. Government Securities</u>
DoubleLine Floating Rate Fund . . . . .	\$ 134,581,032	\$ -	\$ 160,812,336	\$ -
DoubleLine Select Income Fund . . . . .	132,120,586	20,845,844	133,013,059	-

A summary of the Funds' transactions in the USG Select Fund for the year ended March 31, 2026 were as follows:

<u>Fund</u>	<u>Type of Transaction</u>	<u>March 31, 2025 Shares/Fair Value</u>	<u>Purchases</u>	<u>Sales</u>	<u>March 31, 2026 Shares/Fair Value</u>
DoubleLine Floating Rate Fund . . . . .	Direct	\$ -	\$ 19,350,698	\$ 6,152,644	\$ 13,198,054
DoubleLine Select Income Fund . . . . .	Direct	-	43,107,518	38,699,706	4,407,812

## Notes to Financial Statements

March 31, 2026

---

### 8. Borrowing Arrangements

Effective November 6, 2025 (the “Effective Date”), the Funds, along with certain other funds managed by the Manager (“Participating Funds”), renewed a committed revolving line of credit (the “Committed Line”) agreement with State Street Bank and Trust Company (the “Bank”) to be used to facilitate portfolio liquidity. The maximum borrowing amount under the Committed Line is \$100 million with interest at a daily fluctuating rate per annum equal to 1.25% plus the sum of 0.10%, plus the higher of the Federal Fund Effective Rate for the prior day and the Overnight Bank Funding Rate for the prior day. Each of the Participating Funds paid a proportional amount of a quarterly commitment fee at a rate of 0.25% per annum on the unused portion of the Committed Line amount. The Committed Line expires November 5, 2026, unless extended by the Bank or terminated by the Participating Funds in accordance with the agreement.

On the Effective Date, the Funds, along with certain other Participating Funds managed by the Manager, also renewed an uncommitted discretionary demand revolving line of credit (the “Uncommitted Line”) agreement with the Bank to be used to facilitate portfolio liquidity. The maximum borrowing amount under the Uncommitted Line is \$100 million with interest at a daily fluctuating rate per annum equal to 1.25% plus the sum of 0.10%, plus the higher of the Federal Fund Effective Rate for the prior day and the Overnight Bank Funding Rate for the prior day. Each of the Participating Funds paid a proportional amount of a closing fee of \$35,000 on the Effective Date. The Uncommitted Line expires November 5, 2026, unless extended by the Bank or terminated by the Participating Funds in accordance with the agreement.

The Participating Funds paid administration, legal and arrangement fees, which are recognized as a component of “Line of credit interest expense” on the Statement of Operations, along with commitment fees, that have been allocated among the Participating Funds based on average daily net assets.

During the year ended March 31, 2026, the Funds did not utilize these facilities.

<sup>D</sup> Seed capital was received on February 23, 2026 in the amount of \$10,000. As a result, shares were issued in the amount of 1,039.

## 10. Subsequent Events

On August 25, 2025, the Board approved the adoption of the American Beacon DoubleLine Floating Rate Fund and the American Beacon Select Income Fund (the Funds) by the Trust and the change of the Funds' fiscal year end to August 31. As a result, the Funds will have an audit as of March 31, 2026, a transition fiscal reporting period from April 1, 2026 through August 31, 2026, and its first full fiscal year reporting period will cover September 1, 2026 through August 31, 2027.

## Federal Tax Information

March 31, 2026 (Unaudited)

---

Certain tax information regarding the Fund is required to be provided to shareholders based upon the Funds' income and distributions for the taxable year ended March 31, 2026. The information and distributions reported herein may differ from information and distributions taxable to the shareholders for the calendar year ended December 31, 2026.

The Fund designated the following items with regard to distributions paid during the fiscal year ended March 31, 2026. All designations are based on financial information available as of this annual report and, accordingly, are subject to change. For each item, it is the intention of the Funds to designate the maximum amount permitted under the Internal Revenue Code of 1986, as amended, and the regulations there under.

### Corporate Dividends-Received Deduction:

DoubleLine Select Income	0.00%
--------------------------	-------

### Qualified Dividend Income:

DoubleLine Select Income	0.00%
--------------------------	-------

### Long-Term Capital Gain Distributions:

DoubleLine Select Income	\$0
--------------------------	-----

### Short-Term Capital Gain Distributions:

DoubleLine Select Income	\$0
--------------------------	-----

Shareholders will receive notification in January 2027 of the applicable tax information necessary to prepare their 2026 income tax returns.

## Delivery of Documents

If you invest in the Fund through a financial institution, you may be able to receive the Fund’s regulatory mailings, such as the Prospectus, Annual Report, and Semi-Annual Report, by e-mail. If you are interested in this option, please go to [www.icsdelivery.com](http://www.icsdelivery.com) and search for your financial institution’s name or contact your financial institution directly.

You may request a paper copy of this document at no charge by contacting your financial institution. This document is also available for download at [www.americanbeaconfunds.com](http://www.americanbeaconfunds.com) or you can request an electronic copy by contacting your financial institution.

**Item 11. Statement Regarding Basis for Approval of Investment Advisory Contract**

# Disclosure Regarding the Approval of Investment Advisory Agreement

## Approvals Related to American Beacon DoubleLine Select Income Fund

At its August 25, 2025 meeting, the Board of Trustees (“Board” or “Trustees”) considered: (1) the approval of the management agreement (“Management Agreement”) between American Beacon Advisors, Inc. (“Manager”) and the American Beacon Funds (“Trust”), on behalf of the American Beacon DoubleLine Select Income Fund (the “Fund”), a newly created series of the Trust; and (2) the approval of the investment advisory agreement (the “Subadvisory Agreement”) among the Manager, the Trust, on behalf of the Fund, and DoubleLine Capital LP (the “Subadviser”), the Fund’s proposed subadviser.

### Approval of the Management Agreement

Prior to the meeting, the Manager provided information to the Board in response to requests from the Board in connection with the Board’s consideration of the Management Agreement for the Fund. In addition, the Investment Committee of the Board met with representatives of the Manager. The Board also considered information that had been provided by the Manager to the Board at the May 20, 2025 and June 4, 2025 Board meetings in connection with the Board’s renewal of the current Management Agreements pursuant to which the Manager provides services to the existing mutual fund series of the Trust, the American Beacon Select Funds (“Select Trust”) and the American Beacon Institutional Funds Trust (the “Existing Funds”) and another Management Agreement pursuant to which the Manager provides services to the exchange-traded fund series of the Select Trust.

Provided below is an overview of the primary factors the Board considered at its August 25, 2025 meeting at which the Board considered the approval of the Management Agreement with respect to the Fund. In determining whether to approve the Management Agreement, the Board considered, among other things, the following factors with respect to the Fund: (1) the nature and quality of the services to be provided; (2) the estimated costs to be incurred by the Manager in rendering its services to the Fund and the resulting profits or losses; (3) the extent to which economies of scale, if any, have been taken into account in setting the fee schedule; (4) whether fee levels reflect anticipated economies of scale, if any, for the benefit of investors; (5) comparisons of services and fees with contracts entered into by the Manager with respect to the Existing Funds; and (6) any other benefits anticipated to be derived by the Manager from its relationship with the Fund.

The Board did not identify any particular information that was most relevant to its consideration of the Management Agreement, and each Trustee may have afforded different weight to the various factors. Legal counsel to the Trustees who are not “interested persons” of the Fund or the Manager, as that term is defined in the Investment Company Act of 1940, as amended (“1940 Act”), (“Independent Trustees”) provided the Board with a memorandum regarding its responsibilities pertaining to the approval of investment advisory contracts, such as the Management Agreement. The memorandum explained the regulatory requirements surrounding the Trustees’ process for evaluating investment advisors and the terms of investment advisory contracts. Based on its evaluation, the Board unanimously concluded that the terms of the Management Agreement were fair and reasonable.

*Nature, Extent and Quality of Services.* The Board considered that it had reviewed the Management Agreement as it relates to the Existing Funds at its May 20, 2025 and June 4, 2025 meetings. At those meetings, the Board received detailed information regarding the Manager, including information with respect to the scope of services provided by the Manager to the Existing Funds, the financial condition of the Manager, including its parent company, and the background and experience of the Manager’s key investment personnel. The Board considered the Manager’s representation that the advisory, administrative and related services proposed to be provided to the Fund will be generally consistent with the services provided to the Existing Funds, as applicable. In addition, the Board considered the background and experience of key investment personnel who will have primary responsibility for the day-to-day oversight of the Fund. Based on the foregoing information, the Board concluded that the nature, extent and quality of the services to be provided by the Manager were appropriate for the Fund.

*Investment Performance.* The Board considered that the Fund is new and, therefore, had no historical performance for the Board to review with respect to the Manager. The Board considered information provided by

## Disclosure Regarding the Approval of Investment Advisory Agreement

the Manager regarding the performance of the registered investment company advised by the Subadviser that the Manager and the Subadviser were proposing be reorganized into the Fund (the “Predecessor Fund”), as compared to: the benchmark index of the Predecessor Fund, which was also the proposed benchmark index of the Fund; the Predecessor Fund’s Morningstar, Inc. (“Morningstar”) category; and a peer group of funds that the Manager believes will be direct competitors of the Fund (the “Select Peer Group”). The Board considered information provided by the Manager regarding the comparative performance of the Predecessor Fund for various periods ended July 31, 2025, including the reasons for certain periods of underperformance.

Costs of the Services Provided to the Fund and the Profits or Losses to Be Realized by the Manager from Its Relationship with the Fund. In analyzing the cost of services and profitability of the Manager, the Board considered the estimated revenues to be earned and the expenses to be incurred by the Manager with respect to the Fund.

The Board then considered the Manager’s representation that, at the Predecessor Fund’s current asset level, the Manager was projected to incur a pre-tax loss before and after distribution revenues and expenses from its first year of rendering services to the Fund, and the amount of this projected loss. In addition, the Board considered the Manager’s explanation regarding its cost allocation methodology in calculating these projections.

Comparisons of the Amounts to Be Paid to the Manager Under the Management Agreement and Other Funds in the Morningstar Category and Select Peer Group. In evaluating the Management Agreement, the Board reviewed the Manager’s proposed management fees. The Board considered a comparison of the management fee rate to be charged by the Manager under the Management Agreement versus the fee rates charged by the Manager to other single-subadviser funds in the Trust. The Board also considered that, for such time as Subadviser serves as the subadviser to the Fund, the Manager proposed to charge the Fund a lower fee rate, as set forth in the Management Agreement. The Board considered information provided by the Manager reflecting the contractual management fee rate proposed by the Manager for the Fund for such time as Subadviser serves as subadviser to the Fund, the total expense ratio, and net expense ratio as compared to the average and median advisory fee rate, total expense ratio, and net expense ratio paid by funds in the Predecessor Fund’s Select Peer Group. The Board also considered that the proposed combined contractual management fee rate proposed for the Fund is equal to the advisory fee rate of the Predecessor Fund.

The Board considered that the Manager had agreed to contractually limit the Fund’s total expenses (subject to certain standard exclusions) for at least two years from the closing date of the reorganization of the Predecessor Fund into the Fund, at competitive market levels. This information assisted the Board in concluding that the management fee rate appeared to be within a reasonable range for the services to be provided to the Fund, in light of all the factors considered.

Economies of Scale. The Board considered the Manager’s representation that the proposed management fee rates for the Fund reflect the possibility of future economies of scale for the benefit of the Fund’s shareholders.

Benefits to Be Derived from the Relationship with the Fund. The Board considered the Manager’s representations regarding potential incidental benefits that the Manager might realize from this proposed new relationship, including those relating to potential cross-selling opportunities, and that the Manager will benefit from the Fund’s investment of its cash sweep accounts in the American Beacon U.S. Government Money Market Select Fund, a series of the Select Trust. The Board also considered the Manager’s representation that the Fund will likely benefit from its relationship with the Manager by having a manager with competitive rates of return, a well-diversified and conservative investment approach and lower than average costs, and from potential cross-selling opportunities. Based on the foregoing information, the Board concluded that the potential benefits accruing to the Manager by virtue of its relationship with the Fund appear to be fair and reasonable.

Board’s Conclusion. Based on the various considerations described above, the Board, including a majority of Trustees who are not “interested persons” of the Fund or the Manager, as that term is defined in the 1940 Act: (1) concluded that the proposed management fee is fair and reasonable with respect to the Fund; (2) determined

## Disclosure Regarding the Approval of Investment Advisory Agreement

that the Fund and its shareholders were expected to benefit from the Manager's management of the Fund; and (3) approved the Management Agreement on behalf of the Fund.

### Approval of the Subadvisory Agreement

Prior to the August 25, 2025 meeting, the Subadviser provided information to the Board in response to requests from the Board and/or the Manager in connection with the Board's consideration of the Subadvisory Agreement. In addition, the Investment Committee of the Board met with representatives of the Subadviser. The Board also considered information that had been provided by the Subadviser to the Board at the June 4, 2025 Board meeting in connection with the Board's approval of the current Subadvisory Agreement pursuant to which the Subadviser provides services to the American Beacon DoubleLine Floating Rate Income Fund ("Floating Rate Fund"), an existing series of the Trust.

Provided below is an overview of the primary factors the Board considered at its August 25, 2025 meeting at which the Board considered the approval of the Subadvisory Agreement. In determining whether to approve the Subadvisory Agreement, the Board considered, among other things, the following factors: (1) the nature, extent and quality of the services to be provided; (2) the investment performance of the Predecessor Fund; (3) the extent to which economies of scale, if any, have been taken into account in setting the fee schedule; (4) whether fee levels reflect these economies of scale, if any, for the benefit of investors; (5) comparisons of services and fees with contracts entered into by the Subadviser with other clients; and (6) any other benefits anticipated to be derived by the Subadviser from its relationship with the Fund.

The Board did not identify any particular information that was most relevant to its consideration of the Subadvisory Agreement, and each Trustee may have afforded different weight to the various factors. Legal counsel to the Independent Trustees provided the Board with a memorandum regarding its responsibilities pertaining to the approval of investment advisory contracts, such as the Subadvisory Agreement. The memorandum explained the regulatory requirements surrounding the Trustees' process for evaluating investment advisors and the terms of investment advisory contracts. Based on its evaluation, the Board concluded that the terms of the Subadvisory Agreement were fair and reasonable.

*Nature, Extent and Quality of the Services to Be Provided by the Subadviser.* The Board considered that it had reviewed the Subadvisory Agreement as it relates to the Floating Rate Fund at its June 4, 2025 meeting. At that meeting, the Board received detailed information regarding the Subadviser's principal business activities and overall capabilities to perform the services under the Subadvisory Agreement, as well as the Subadviser's investment resources, infrastructure and the adequacy of its compliance program. In addition, the Board considered the background and experience of the personnel who would be assigned responsibility for managing the Fund. The Board considered the Subadviser's representation that its current staffing levels were appropriate to service the Fund. The Board also took into consideration the Manager's recommendation of the Subadviser. Based on this information, the Board concluded that the nature, extent and quality of the subadvisory services to be provided by the Subadviser were appropriate for the Fund considering its investment objective and, thus, supported a decision to approve the Subadvisory Agreement.

*Performance of the Subadviser.* The Board considered the information provided by the Subadviser regarding the performance of the Predecessor Fund; the benchmark index of the Predecessor Fund, which was also the proposed benchmark index of the Fund; and the Fund's Morningstar category. The Board considered information provided by the Subadviser regarding the comparative performance of the Predecessor Fund for various periods ended June 30, 2025. Based on the foregoing information, the Board concluded that the historical investment performance record of the Subadviser supported approval of the Subadvisory Agreement.

*Comparisons of the Amounts to Be Paid Under the Subadvisory Agreement with Those Under Contracts Between the Subadviser and Its Other Clients.* In evaluating the Subadvisory Agreement, the Board reviewed the proposed subadvisory fee rate under the Subadvisory Agreement for services to be performed by the Subadviser on

## Disclosure Regarding the Approval of Investment Advisory Agreement

behalf of the Fund. The Board considered that this fee rate would be paid to the Subadviser by the Fund. Additionally, the Board considered the Subadviser's representation that the proposed subadvisory fee rate is lower than that of the Predecessor Fund and the Subadviser's standard fee schedule for accounts within the strategy of the Fund. After evaluating this information, the Board concluded that the Subadviser's subadvisory fee rate under the Subadvisory Agreement was reasonable considering the services to be provided to the Fund.

Costs of the Services to Be Provided and Profits to Be Realized by the Subadviser and Its Affiliates from Its Relationship with the Fund. The Board did not consider the costs of the services to be provided and any profits to be realized by the Subadviser from its relationship with the Fund, noting instead the arm's-length nature of the relationship between the Manager and the Subadviser with respect to the negotiation of the advisory fee rate on behalf of the Fund.

Economies of Scale. The Board considered the Subadviser's representation that it believes that the proposed subadvisory fee rate for the Fund was reasonably designed to reflect and share with shareholders achievable economies of scale in connection with the services that it proposes to provide to the Fund.

Benefits to Be Derived by the Subadviser from Its Relationship with the Fund. The Board considered the Subadviser's representation that there are indirect benefits that may accrue to it or its affiliates because of Subadviser's proposed relationship with the Fund, such as beneficial publicity from the relationship. Based on the foregoing information, the Board concluded that the potential benefits accruing to the Subadviser by virtue of its relationship with the Fund appear to be fair and reasonable.

Board's Conclusion. Based on the various considerations described above, the Board, including a majority of Trustees who are not "interested persons" of the Fund, the Manager or the Subadviser, as that term is defined in the 1940 Act, concluded that the proposed investment advisory fee rate is fair and reasonable and approved the Subadvisory Agreement.
