The use of **fixed-income securities** entails interest rate and credit risks. **Interest rate risk** is the risk that debt securities will decrease in value with increases in market interest rates. **Credit risk** is the risk that a debt issuer will fail to make timely payment of interest or principal; if the credit rating of an issuer declines, then the price of its debt securities may also decline. To the extent the Fund invests more heavily in particular sectors, its performance will be sensitive to factors affecting those sectors. **Financial sector** companies are heavily regulated and particularly sensitive to interest rate fluctuations. The Fund's incorporation of **environmental, social and/or governance (ESG)** considerations in its investment strategy may cause it to underperform funds that do not incorporate these considerations. Please see the prospectus for a complete discussion of the Fund's risks. There can be no assurances that the investment objectives of this Fund will be met.

Important Information: All investing involves risk, including possible loss of principal. Indexes are unmanaged and one cannot invest directly in an index.

A portion of fees charged to each Class of the Fund has been waived since Fund inception. Performance prior to waiving fees was lower than actual returns shown for periods when fees were waived. Specific information about any Fund may be found at americanbeaconfunds.com or in the prospectus.

The Growth of $10,000 graph shows a fund's performance based on how $10,000 invested in the fund would have grown over time with dividends reinvested.

The Bloomberg U.S. Aggregate Bond Index is a broad-based benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market. Duration is a measure of price sensitivity relative to changes in interest rates. Standard Deviation is a measure of the historical volatility of the Fund's returns.

S&P credit ratings for long-term obligations (or issuers thereof) are AAA, AA, A, BBB, BB, B, CCC, CC, C and D in decreasing order. For example, obligations rated AAA are judged to be of the highest quality, BBB to be of medium grade, CCC are judged to be speculative and obligations rated D are in default. Obligations rated in one of the four highest categories are considered to be investment grade while all other ratings are considered non-investment grade.

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within the scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of performance figures associated with its three-, five- and 10-year (if applicable) Morningstar Rating metrics. In the U.S.-domiciled Intermediate Core Bond category, the American Beacon Garcia Hamilton Quality Bond Fund (R5 Class) was rated 2 stars out of 417 funds overall. The fund was rated 1 stars out of 417 funds; 4 stars out of 383 funds; 2 stars out of 285 funds for the three-, five- and 10-year periods, respectively. Past performance is no guarantee of future results.
